

LANCASTER, KY., THURSDAY AFTERNOON, JULY 15, 1920.

NUMBER 17.

THIRTY-FIRST YEAR

ARTHUR JOSEPH

Changes Quarters In Somerset

You can't keep a good man down. Arthur Joseph who moved to Somerset a few years ago and established one of the most up-to-date ladies ready-to-wear stores in that city has just moved into his new quarters. Here's what the Somerset Journal says about it:

The A. J. Joseph Co., ladies ready-to-wear, has moved from the Smith building to their new and handsome quarters in the Wait building formerly occupied by the Kentucky Utilities Co. Mr. Joseph has spent considerable money in fixing up his new store and it is one of the prettiest to be found in this section of the state. It is a credit to a town much larger than Somerset.

Mr. Joseph came to Somerset several years ago and built up a big business by honest dealing and courteous treatment. He is a real booster for Somerset.

The new store room is conveniently arranged with dressing rooms, sewing rooms, fitting rooms and rest room. Mr. Joseph invites the public to visit his new quarters.

5,000 Jailed in

Slacker Hunt

FARM PURCHASES PROBED

WASHINGTON. Five thousand draft-evaders have been convicted in Federal Courts and given sentences of from thirty days to one year in prison, according to reports compiled recently at the Department of Justice. Thirty thousand cases remain to be investigated, but officials said today that rapid progress was being made in rounding up the delinquents. The figures, it was explained, do not include cases of persons who were called in the draft and deserted, as such cases are handled by the military authorities.

So far approximately 275,000 cases of delinquents—men who succeeded in avoiding actual entrance into the service—have been investigated by the department out of a total of 318,314 reported. The result of the investigation show about 10,000 cases of failure to register and an equal number of questionnaires.

About 25 per cent of the men listed as delinquent's agents were found by the department's agents to have enlisted in the American or Allied Armies without the knowledge of their local boards.

About 40 per cent of the draft department on the score of the float-dodgers are accounted for by the delinquent population with no permanent homes and some 20 per cent are considered as nonwillful delinquents who failed to perform their duty through ignorance.

The latter is made up of cripples and willful delinquents who intentionally avoided service.

Careful attention is being given false questionnaire returns, officials declared, as well as cases where wealthy men bought farms before the call came and obtained deferred classification on the ground of necessary industry.

Union Service.

The union service Sunday night will be at the Methodist Church. Sermon by Rev. U. E. Strother.

Public Sale.

As a committee of the Freedom Church, will sell at auction at the church, one mile south of Nina, Saturday July 24th, at two o'clock, about 30 church benches in good condition.

(7-15-21-pd.)

— B. T. Lunsford.

Automobile Owners

Attention.

We are prepared now to take care of your automobile repair work on all cars.

If you want service and guaranteed satisfaction this is the place to come.

We are willing to stand behind any and all work turned out by us. If you are not satisfied we will refund your money or make the job right either way you prefer.

Let us have a trial at something that some one else has failed to do to your satisfaction.

We are here to do as we say, and only ask a trial of you.

CENTRAL GARAGE,
William Marsee, Proprietor,
C. B. Turner, Mechanic. 6-24-4t.

PAUL ELLIOTT

Accepts Position In The National Bank.

The appointment of Paul Elliott to the position of book-keeper at the National Bank was a wise and popular selection, unanimously made by the directors of this institution last week. Mr. Elliott succeeds Mr. Randolph Harris who resigned several weeks ago, and assumed his new duties this morning.

He has been the head book-keeper for Haselden Bros. Garage for some time and his past work along this line makes him eminently qualified for his handsome promotion.

FAILED

Charles G. Stephens, of Bristol, England,

Who Tried to Duplicate Feat of Notables, by Going over Niagara, in Barrel, Is Drowned

NIAGARA FALLS, July 12. Rivermen patrolled Niagara Gorge below the Falls today in hope of recovering the body of Charles G. Stephens, Bristol, England, who lost his life yesterday in an attempt to duplicate feat of Mrs. Annie Edson Taylor and Bob Leach going over cataract in a barrel.

Pieces of barrel found below falls, but Stephens' body failed to appear. Stephens had a wife and eleven children. He was a lumberer.

How Cox Was

Nominated.

The Courier-Journal prints a dispatch from San Francisco from one Mark Sullivan, under date of July 7, in which the following appears:

Doubtless the Republican papers will say that the bosses dominated the convention and named Gov. Cox, and it is true. They did, but several important implications that will be read into that are not true.

Following this there is a good deal about the support given Mr. Cox through the convention by the delegations from New York and Illinois, a studied attempt to make it appear that President Wilson sought to dominate the convention in the matter of a nomination and failed, and a great deal of undeserved and purely mischievous abuse of Mr. McAdoo, accompanied by references to Mr. McAdoo's "stupidity" during the convention.

Mr. McAdoo could not have been guilty of "stupidity" at the convention, for he was not there, and everyone knows that he refused to send a single communication to a single delegate during the convention. Mr. McAdoo had earned support in that convention from men who declined to go to any other candidate, but it is not true that the President sought to take a hand. The President was interested in the matter of the platform, but he was "hands off" in the matter of the nomination.

And the assertion in the Courier-Journal dispatch that Governor Cox was "named by the bosses" is simply inaccurate. It is true that the Tammany delegation from New York and the Illinois delegation voted for Governor Cox. It is possible—we wish to be absolutely frank—that Governor Cox would not have been nominated without that support. But New York and Illinois did not nominate Governor Cox. The proof of this is conclusive. New York and Illinois went to Cox on the third ballot; he was not nominated until the forty-fourth. Between the third ballot and the last Cox secured 300 and more votes from delegates who declined to follow New York into the band wagon early in the fight.

Governor Cox was not nominated by the bosses; he was nominated by the delegates. The battle was fought out on the floor of the convention. If anyone asks, was Cox the choice of the delegates from the beginning, the answer must, of course, be in the negative. In the beginning the delegates were divided in opinion and could not agree; at the end of a hard fight more than two-thirds of the delegates decided that Cox was the proper man to unite upon, and his nomination followed.—Louisville Post.

Speaks At Paint Lick.

Hon. George T. Davis, candidate for Congress at the August primary will address the citizens of Paint Lick Saturday afternoon, July 17th, in the interest of his candidacy. Mr. Davis has invited his opponents and will give them an equal division of time.

KICKED BY HORSE

Mrs. Menefee Elmore Dies As Result Of Wounds.

A sad and pathetic tragedy occurred near Preachersville last Wednesday afternoon, when Mrs. Menefee Elmore had the misfortune to be kicked in the stomach by a horse which she was attempting to catch, being so badly injured that her death followed Friday.

Unfortunately her husband was in Nebraska seeking health, but upon being notified reached home in time for the funeral which took place Sunday afternoon. It was indeed a sad shock to him and the sympathy of the community goes out to him and his eight little children, who are suddenly deprived of a mother's love and care. Mrs. Elmore was an excellent woman and a daughter of Mr. and Mrs. W. H. Cummins. The aged parents are all but crushed by the tragic death of their daughter. She is also survived by six sisters and one brother. The funeral services were conducted at the home by Mr. J. P. McClary, where one of the largest gatherings ever seen at a funeral had congregated to pay their last respects to one who was the idol of the community and beloved by all who knew her. The burial took place in the Preachersville cemetery.

Mitchell.

Mr. Louis Mitchell, oldest son of Mr. Charlie Mitchell, formerly of this county, died at the Mayo Infirmary last Sunday morning after a protracted illness of three years. He leaves a widow who has the sympathy of the community in the sad loss of a devoted and fond husband.

His remains were brought to the home of her sister, Mrs. N. Brown, on the Lexington road and the funeral held Tuesday afternoon at 2:30 o'clock, the Rev. Holder, pastor of Pleasant Grove Church, officiating. He was born and reared in this county, was forty-three years old a member of the Christian church and the superintendent of the Sunday School at Scotts Fork.

He was a most patient and cheerful sufferer. Mr. Mitchell is survived by his wife, father, Mr. Charlie Mitchell, of Jessamine, five sisters and three brothers. His loyalty and devotion to the cause of the Master, was a testimony of his splendid Christian character. The course of friends and relatives and the beautiful floral tributes showed the appreciation and esteem of which he was held. The burial took place in the family lot in the Lancaster cemetery.

Baptist Church Notes

Sunday evening at seven o'clock, the B. Y. P. U.'s will render a playlet, entitled "To Live, Or Not To Die?" This is an allegorical play written by Myrtle Robinson Creasman, and in a vivid way contrasts the forces that are helpful to Christian service and those that are harmful. We are very anxious that all B. Y. P. U. members and those who should be, will be present. Miss Lillian Estes will possibly be back to give a report on the B. Y. P. U. Assembly, which recently met at Georgetown. This service will be an important to miss. Come One! Come All!

At the eleven o'clock service the pastor will preach on the subject: "Gods Amens." At the Union Service, which is to be held at the Methodist Church, Sunday evening, the pastor will speak on the question: "Can we now see Jesus?"

Sunday is flower day in the Sunday School. It is hoped that every pupil will wear a flower, and that every class will have a bouquet. At the close of the hour it will be determined which class has the most beautiful bouquet, and shall be paid a tribute of praise.

McMakin-Tribble.

Yesterday afternoon at four o'clock the marriage of Mrs. Katherine McMakin to Mr. John Tribble was solemnized at the home of the brides parents, Mr. and Mrs. Jim Allen Arnold. Rev. Frank Tindler, of the Hubble Christian church performing the ceremony.

Mrs. McMakin has a host of friends in Garrard county where she was born and reared and is one of the most popular ladies in the county. Mr. Tribble is one of Garrard's most successful farmers and a splendid gentleman. The good wishes of the community go out to them for a long and congenial life of happiness.

CELEBRATE

Ascent Of Pike's Peak.

Centennial of Long Expedition Feat Marked With Ceremony.

Colorado Springs, Colo., July 14th. The one hundredth anniversary of the first ascent of Pike's Peak was celebrated in Colorado Springs today when special exercises were held at the summit and along the automobile highway that climbs eighteen miles over a serpentine route to the top, 14,109 feet above sea level. Altho Lieutenant Zebulon M. Pike, the intrepid explorer, first discovered Pike's Peak in 1806, he never scaled the mountain branding the task as impossible for a human being.

But Dr. Frank James, a member of the expedition of Major Long, in 1820, made the journey from Fountain Creek near Colorado Springs to the summit. Major Long, in honor of James' accomplishments, named the peak "James' Peak," but as early as 1870 trappers and plainmen named it "Pike's Peak," and the name remained.

Two Million Reach Summit.

Since then two million people have visited the summit, it is estimated; the crowds of tourists in the last twenty-five years forming the bulk. In 1878 a bridle path was built; a wagon road to the summit was built in 1891 the cog wheel railroad, nine miles long was built. Busses were also at that time.

In 1916 the present automobile road was built at a cost of \$300,000 after two years of construction work and many difficulties, especially in securing labor. This road is eighteen miles long rises 8,495 feet in distance, has an average grade of 7 per cent and a maximum grade of 10 1/2 per cent of the line in curves. It is twenty feet wide with curves as wide as fifty feet.

Aeroplane Flies Over.

In April, 1919 a government war tank attempted to climb the peak over the automobile, but could not get over the deep snow drifts; however a month later a caterpillar, used for artillery hauling made the summit without difficulty. On August 3, 1919 an aeroplane piloted by Alexander Lendorn of Colorado Springs, made a successful trip over the summit of the peak.

Pike's Peak is eight miles in an air line from Colorado Springs and the greater part of the mountain is controlled by the City of Colorado Springs for its watershed.

Stage Races to Top.

Walking races, burro races and motorcycle races have been made to the top, and many noted race drivers, including Ralph Mulford, Barney Oldfield, Hughie Hughes, took part in the automobile races in 1916. Mulford made the best time for the twelve-mile course from Crystal Creek to the summit, this being 18 minutes and 26 seconds.

In September the auto hill-climb contests, which was discontinued during the war period, will be resumed as well as an aeroplane race around the peak from Denver.

Smith Residence Sells.

Mr. J. W. Smith has sold this week his handsome residence on Maple avenue, where he now resides, to Miss Helen and Martha Gill.

This is one of the prettiest homes in Lancaster, many of which Mr. Smith has built, being admirably located and finished both interior and exterior, with every modern convenience. Possession will be given immediately upon the completion of the new home which Mr. Smith is erecting on the lot purchased of Mr. W. O. Rigney and adjoining that property.

Read Predicts

Cox's Election.

LEXINGTON.—Opie Read, of Chicago, famous novelist and lecturer, in an interview predicts the election of Governor Cox, because "Governor Cox has a strong party organization behind him and the Democrats have a platform this year which approaches the issues of the campaign fearlessly." Mr. Read is a Republican and knows both Presidential candidates personally.

Card Of Thanks.

To the relatives, friends and neighbors, we wish to express our sincere gratitude, for their kindness shown during the illness and death of our beloved brother and husband. Such kindness will always be remembered most gratefully.

—Mr. and Mrs. Norman Grow, Mrs. L. D. Mitchell.

JUDGE GILBERT

Looking After His Fences In This County. Having Great Success.

Judge Ralph Gilbert has been in Garrard county for several days conferring with his friends and getting acquainted with the democrats of this county in the interest of his race for the democratic nomination for Congress. This county was claimed by the friends of Col. Rippey by a safe majority but upon a canvas of the Democratic voters, Judge Gilbert's friends claim that the counting of noses on August 7th, the day of the Primary, Judge Gilbert will be far in the lead here. The strength developed here by Judge Gilbert will prove a great surprise to his opponents in this race and assures him the nomination.

The way that democrats who have heretofore been non committal have come out strong for Gilbert shows the drift in the district and discourages the other candidates so much that his friends claim that long before the date of the primary Judge Gilbert's election will be conceded. He has succeeded in perfecting a good organization here who will carry on a vigorous fight in his interest until the polls are closed on August the 7th. Judge Gilbert's friends claim that since Governor Cox has stated his position on the liquor question and made it plain that the candidate for president does not consider it an issue in the presidential contest but one to be settled in the congressional elections that this district being dry he is the logical man to be nominated and is the strongest of the three candidates to pit against King Swape, the present Congressman from this district. Judge Gilbert was greatly pleased at the nomination of Cox and Roosevelt at San Francisco and thinks the Democrats have the strongest ticket ever nominated by the party and that they will win in November and that Kentucky will be sure to be in the Democratic column.

Big Day Planned By Lancaster Chamber Of Commerce

In order to bring about closer business relations and get together for good roads between the different sections of Garrard County and the County Seats, a big day is planned for August 18th, by the Lancaster Chamber of Commerce. On this day the principal business firms of Lancaster to the number of 50 or more intend to make a days tour of the County, stopping at various places with the Lancaster Band and have talks with the country merchants and farmers in each locality visited. There will be a number of good speakers to address the people at each stop and plenty of good music. Altogether an enjoyable day is anticipated by those who will make this trip as well as their neighbors and friends upon whom the calls are to be made. In union there is strength and by cooperation of all interests it is felt that many desirable things will be accomplished for the good of the county which cannot be secured in any other way. The slogan will be "Boost for our own Home County."

Better Train Service Wanted

Lexington, Ky.—Renewed efforts to get better train service between Lexington and Lancaster, Stanford, Crab Orchard and other points in the territory South of Lexington, will be made shortly by the Lexington Board of Commerce according to action taken recently by the board of directors of the commercial body.

The matter has already been presented to railroad officials, who have had the matter under consideration and prepared to meet with officials of the Board of Commerce to go into the matter in detail.

A meeting will be arranged shortly, probably in Lexington, where proposed schedules will be submitted and a full hearing of the matter held.

Firestone Man Here.

Mr. Walter F. Hupp, representing the Firestone Tire and Rubber Co., was in our city again last week in the interest of his company.

He is chucked full of "ship by truck" an original Firestone idea, and the public is beginning to appreciate his activities along this line and his co-operation along this progressive movement.

"COX THE UNBEATABLE"

Says "Marse" Henry In The Following to the Courier Journal

To the Editor of the Courier-Journal Write it Cox the Unbeatable!

He is a journalist and that means a deal. The Lawyer is a controversialist, a logician, a master of doctrines, theories, equities. The Doctor is a healer, and more or less a specialist. The journalist is an all-around man of affairs.

That is what we require in a President of the United States.

It will not be denied that Woodrow Wilson is a highly qualified man. The record of his Administration will read well in history. If I wished to be critical I should say that he is too much the doctrine, too much the humanitarian, too much the phrasemaker.

Cox is not of this kidney. He is a man among men. He has shown himself ever a practical man, a man of sense and judgment—who as the saying puts it, "has studied the cue papers" and ascertained the difference between hawk and buzzard. In a word, he does things.

We want, we need, that sort of man in the White House.

Now comes the chance for the Democrats of Kentucky to get together, to wipe out the old scores and, with a long pull, a strong pull and pull all together to line up once more on the Resolutions of '98 and fifty-four-forty-eight.

Write it Cox the Unbeatable.

Better get aboard the Band Wagon, boys!

—Henry Watterson.

Buchanan.

Mr. James K. Buchanan, age 63 and one of the best men of the west end of this county, died at his home on the Liberty pike just beyond Hustonsville, at eight o'clock Wednesday morning after years of illness.

He was a very industrious farmer as well as a splendid citizen. He was a christian man, having been a member of the Baptist Church for years.

He is survived by a wife and two daughters, Mrs. Thomas Ballard of Lancaster and Mrs. J. K. Helm Jr. and one son, Edward Buchanan both of Hustonsville.

The burial occurred in Hustonsville cemetery, Thursday afternoon after the funeral services by his pastor, Rev. N. F. Jones.

WAR ENRICHES

U. S. AND JAPAN

London.—Tabulations of changes in the wealth of nations made for the Bankers' Institute here show the United States and Japan to be the only nations of those involved in the war whose wealth increased during that period.

An analysis by Edgar Crammond, noted British financial authority, says in part:

"The war has produced an extraordinary change in the economic relations of the United States with Europe. Whereas in 1914 America owed Europe \$10,000,000,000, at present Europe owes America \$10,000,000,000. It was not suggested before the war that the United States was a bankrupt country, and, as a matter of fact, Europe found it to her advantage to continue to lend this large sum to America until the war compelled her to call it in.

Advantage in Lending Europe.

"American investors show an extraordinary incapacity to realize the great advantages which would accrue to their country thru the intelligent investment of capital abroad. In 1914 the national wealth of the United States was computed at \$210,000,000,000. Today it is in the neighborhood of \$350,000,000,000 to \$400,000,000,000.

"Assuming that the post-war purchasing power of the dollar for internal purposes is 70 per cent of its pre-war value. It may be said that during the last five years there has been an actual increase in the national wealth of the United States of approximately 30 per cent.

"The nominal war debt of a beligerent does not necessarily form the main part of the real cost of the war, because, in so far as the debt is an internal one, it only represents a transfer of wealth from one group of the inhabitants of a country to another

WHY FARMERS' WIVES GROW OLD EARLY

A Farm Kitchen With Conveniences Like This Is One of the Urgent Needs on Many Farms. Investigation Show.

Walking 457 miles a year to get water for her family's use is the record of one New Mexico woman, as revealed by a survey of farm home conditions made not long ago by the United States department of agriculture and the state extension service. In addition to carrying 32 tons of water, which is a minimum for a family of six to use in a year, she did all the housework and helped with the field work and care of the live stock. Here is the story she tells:

"We live on a farm of 800 acres located one and a quarter miles from a small town. We have no automobile but use horses and wagons as a means of transportation to town or elsewhere. We live in a six room house which is heated by stoves and heated by stoves. I have no labor-saving devices, except a built-in kitchen cabinet or cupboard, a sewing machine and a washing machine run by hand power.

"There are six members in the family, including two children between ten and sixteen and two under ten years of age. During harvest, she filling or thrashing we have eight extra helpers. I have no help in the house except that of three children in carrying wood and coal and running errands. During the first six months of 1919 five members of the family were ill in bed a total of twenty-three days.

Why Farmers' Wives Grow Old Early.

"I do the washing and ironing for the entire family, make my own outer garments and part of the children's clothing, and bake all my own bread. The water for household purposes must be carried a distance of 400 feet and this is one of my daily tasks as well as the care of 50 chickens. The eggs from this flock are marketed at the nearest store and the money is used for general housekeeping purposes.

"I help with the milking of 32 cows and wash the milk pails and separating. The cream is sold and used for general housekeeping expenses. During eight months of the year I help with the farm work, care for the vegetable garden and help care for the live stock.

"In the summer I rise at five o'clock and my working day ends at 9:30 p. m. with no time free. In winter the day begins at 6 a. m. and lasts until 8 p. m. with no time off. I work on an average of fifteen and a half hours a day three hundred and sixty-five days in the year, with not even my noon hour free."

Survey blanks were filled out by 244 New Mexico farm women, and about one-half of them reported water brought by hand from a distance of 300 to 400 feet. The average was 47 feet. In over 60 per cent of the cases the housewives did the carrying.

One gallon of water with a bucket weighs at least 8 1/2 pounds. One woman who lived on a farm and carried water for a family of five, which statistics show to be the size of the average American family, reports that it takes six pails of water for the ordinary day, and she has counted many times the 16 pails required for the family washing. Six pails of water 365 days in the year make 2,190 pails; 16 pails for the washing, 52 weeks in the year, make 832 pails, or a total of 3,022 pails of water for a family of five in a year. Taking this as the usual amount of water used, and the 47 feet as the average distance carried, the distance traveled in one year is 59 miles.

Woman Carries Water 457 Miles.

Besides traveling this distance she must bear the weight of the water. Ordinary pails contain from 2 1/2 to 3 gallons; 3,022 pails of 2 1/2 gallons will equal 7,555 gallons. Using 8 1/2 pounds which is a low estimate, as the weight of one gallon of water and the container, Mrs. Average Farmer in New Mexico carries in one year 64,217 pounds or 32.1 tons. This is not all, for the water she carries into the house must all be carried out again. So she lifts another 32.1 tons in carrying it out, which makes 64 tons carried in a year.

But That's Only One Item.

The woman who bears children and cares for them, their father and the hired man, cooks for them, does the washing, ironing and family sewing, does the housecleaning, cares for the chickens, weeds the garden, travels miles about an inconvenient kitchen

doing her housework, walks 53 miles and carries 61 tons of water during the year. Is not getting a fair show, the United States department of agriculture believes.

Small wonder it is, under these conditions, that as soon as possible the farm woman wants to move into town, where she can have more conveniences and where she thinks life is more pleasant and less strenuous.

The home demonstration agents are teaching farm women the value of simple and inexpensive equipment which eliminates inconvenience and drudgery. In many instances it is lack of thought on the subject rather than lack of money that compels the farm housewife to do work under such handicaps. If the exodus from the farm to the city is to be stopped, the farmer's wife must be given a chance at health and happiness on the farm; otherwise she will use her influence toward moving to town.

MUCH WASTEFULNESS IN AWKWARD HABIT

Considerable Energy Saved in Doing Things Right Way.

One of Several Facts Disclosed by Experiments Made by Office of Home Economics—Low Kitchen Table Is Wearing.

From buttoning shoes to washing dishes, there is an easy and awkward way of doing all work, as everyone well knows. Now, along comes the scientist, who says his experiments show that, aside from feeling and looking more comfortable when you do your work in the right way, you also save considerable energy.

This fact is one of several which recent experiments made by the office of home economics of the United States department of agriculture have disclosed. These experiments have been made for the purpose of determining the energy requirements of an individual in the various circumstances of his daily life and for use in estimating the amounts and kinds of food required by him to meet the needs of his body for energy.

It was found in the homely everyday task of dish washing that, when a woman washed dishes on a table so low that she was obliged to bend over, her energy output was 30 calories per hour. When she washed them on a table that was a little too high for comfort, it required 25 calories per hour, while only 21 calories were used when the working surface was of the right height.

It doesn't take long to saw off the legs of a table or to put blocks under it which will make it the right height.

Household Questions

Beefsteak and oysters make a good shepherd's pie.

Raffia makes a good covering for the rusty clothes hanger.

Rich sauces, spices and pastry should all be avoided.

Pig paste makes an excellent filling for layer cake or for pie.

Be sure not to get too much butter in a pound cake or the cake will be heavy.

Weight rather than size should govern the selection of cabbage. A small, firm head is the best.

Glycerin smeared around the glass stoppers of bottles will keep them for a long time from sticking.

An apron of white oilcloth worn while washing clothes or dishes saves the wear of dresses and the laundry bill.

July Clearance Sale

Began Monday, July 12th

and will Continue for 15 Days

20 PER CENT Discount

WE WILL PUT ON SALE OUR ENTIRE STOCK OF MERCHANDISE AT A 20 PER CENT DISCOUNT. THIS MEANS THAT FOR EVERY DOLLARS WORTH OF GOODS YOU BUY YOU ONLY HAVE TO PAY 80 CENTS FOR SAME.

As this sale is given on everything in the house it means a great saving for you.

WE WILL ALSO ON THURSDAY, JULY 15th GIVE TO THE FIRST FIVE PEOPLE WHO BUY AS MUCH AS \$15.00 WORTH OF MERCHANDISE A CREDIT BILL FOR \$1.00 BESIDES THE REGULAR DISCOUNT.

We will sell goods during this sale CHEAPER than we ever have at any other sale.

Everything sold for CASH and nothing sent out on APPROVAL during sale.

J. E. DICKERSON & SON

LANCASTER, KENTUCKY.

WARNING!

Notice is hereby given that all LIVE STOCK found running at large on the public highway in Lancaster, Bryantsville, and Buckeye-Walker magisterial districts of Garrard county, will be taken up, and the owners of same will be fined as provided by law.

Forest Stapp,
JUDGE.

A. K. Walker,
SHERIFF.

Natural Supposition.
The girls employ such a redundancy of nomenclature in describing their garments, such as slip-over night-gowns, for instance, that if they ever really should come to our style of dress we suppose they'd call 'em step-in pants.—Ohio State Journal.

Willing to Take a Chance.
Mother was trying to give her small son a dose of castor oil, and after much coaxing and pleading he would not swallow it. She said to her husband: "Billy will not take the oil; we will just have to use main force." Billy's face brightened and he said: "Daddy, being the main force and I will try to swallow that."

Youth's Irrerence.
One evening mother wanted her children to go to lenten services with her. One of our favorite movie actresses was on the screen that night and brother wanted to see her. Mother wouldn't let him and made him go to church instead. He lost his patience and said, "Gosh, I wish they would stick the sign out, 'No children allowed.'"—Exchange.

Dyehouse of Liberty before returning home.

Mr. and Mrs. Maat Pollard entertained in honor of her sister, Miss Aline Sutton, at a lawn fete last Tuesday evening. About eighty guests partook of the delightful refreshments served by Miss Sutton.

Mr. Chad Cotton, and family of Floyd County, Mr. Boyd Isom of Letcher Co., Mr. Kelley Hogg and daughter of Georgetown and Misses Maggie Hogg and Laura Honaker, of Dayton Ohio have been visiting Mr. and Mrs. Ryle Isom.

Mrs. Skaggs was quite near sick Sunday morning when she opened her chicken coop and found twenty-five of her chickens lying with their throats cut. Almost her whole flock has disappeared in like manner saying nothing of the expense of chicken feed and etc.

After the business meeting of the Ladies Working Society, which met with Mrs. Chas Dunn two weeks ago, a very delightful social time was spent. Mrs. Dunn served refreshments and in every way proved an ideal hostess. After music, laughter and song the society adjourned to meet with Mrs. Carrie Turner. Mrs. Skaggs who is making the society a good president offered her resignation at this meeting but was not accepted.

Cables on the Ocean Bed.

The ocean cable between New York, the Azores and the Irish coast rests on the bed of the ocean. Before 1854 engineers of the United States navy discovered that the ocean bed between Newfoundland and the Irish coast was nearly level and composed of soft mud, apparently an ideal place for an ocean cable.

Appearances Are Deceptive.

Those who have been able to catch sight of shells passing through the air have described them as appearing "like long lead pencils with indistinct blurred edges."

Infancy of Rice Cultivation.

Rice was cultivated centuries ago in India and later in Egypt. About the year 1498 its cultivation spread to southern Europe. In 1647 Sir William Berkeley planted one-half a bushel of seed in Virginia.

Enlarged Picture Best.

If you want to get a large photograph of any object, take a small clean-cut picture and enlarge it. The result will be much better than when a large picture is taken directly by placing the camera close to the object.

Like to Read the Ads.

American advertisements in magazines and newspapers are the favorite reading matter of the residents of the West sea region. The people find them far more interesting than the stories and articles, and all the magazines that reach the American consulate at Aden are eagerly borrowed.

Removing Grease Spots.

To remove grease spots from carpets mix fuller's earth and magnesia together in equal proportions by scraping and pounding. Form this into a paste with hot water and spread on the spots. The next day brush it off and, if necessary, repeat the process.

A Woman's House Plan.

It is really remarkable how few women architects there are. Every woman has a sneaking desire to build a house from her own plans. Occasionally one does, just so that she may have enough closets. Then she spends the rest of her life looking in for burglars.—Life.

Overland

The Right Sedan
For Right Now

Its Saving on Tires, Oil and Upkeep Add to the Riding Advantages of Triplex Springs

THE OVERLAND SEDAN is an exceptionally good car for all year use. Its ventilator in the cowl, and adjustable windows, with its thick heat resistance top, with the great riding comfort of Triplex Springs, make it fine for touring. Its great economy, which begins with the low price, is exemplified in many recent extraordinary gasoline records. The most notable was the 355-mile Los Angeles-Yosemite Economy Run in which the Overland Sedan won in its class with an average of 27.6 miles per gallon.

FOR CONGRESS.

We are authorized to announce RALPH GILBERT, of Shelby county, a candidate for the Democratic nomination for Congress in this, the Eighth Congressional District of Kentucky. State Primary Election, Saturday, August 7, 1920.

FOR CONGRESS.

We are authorized to announce COL. FRANK L. RIPPY, of Anderson county, a candidate for the Democratic nomination for Congress in this, the Eighth Congressional District of Kentucky. State Primary Election, Saturday, August 7, 1920.

ON PAPER

(Courier Journal)

There are in the Electoral College 531 votes. Of these the votes of the following States are regarded as sure for the Democrats:

Virginia	12
North Carolina	12
South Carolina	9
Georgia	14
Florida	6
Alabama	12
Tennessee	12
Mississippi	10
Arkansas	9
Louisiana	10
Texas	20
Oklahoma	10
Kentucky	13
Missouri	18
Maryland	8
New Mexico	3
Arizona	3
Total	181

This leaves uncounted 350 votes, out of which the Democrats would have to get eighty-five to win.

There are Republicans hereabouts who will not concede that Kentucky belongs in this column. Because the State elected a Republican Governor last year they are counting on it returning a Republican majority this year. But State elections and Presidential elections are very different. The conditions which gave Morrow the verdict last November will not exist next November. Intelligent Republicans who for publication classify Kentucky as a Republican State know that as between Cox and Harding the odds are against the latter. The Democrats have much more reason to claim that the Republican State of Ohio will vote for Cox than

the Republicans have to claim that the Democratic State of Kentucky will vote for Harding.

Including Kentucky in the foregoing list Cox will have to pick up eighty-five additional votes here and there to win. Omitting Kentucky, he must find ninety-eight more votes. There are those who say he cannot look to the West for these votes because he is "wet." It is doubtful to what extent prohibition can be made to figure in the campaign, with both platforms ignoring it and the candidates free to define their views on it if they choose. But if it should figure so far as to put the bars against Cox in the West, will it not open doors to him in the East? The East and North would be a promising field in which to prospect for those needed eighty-five votes. If the Republicans should lose either New York or Ohio they would have trouble making up their necessary 266 votes in the Electoral College. And if the election were held today the chances would lose Ohio.

WOLF TRAIL.

Mr. Josiah McCulley has been on the sick list.

Mr. Allie Reynolds was with relatives Sunday.

Mr. George Gilliam has purchased a Dodge car.

Miss Jessie Ray spent the week end with Miss Thelma Simpson.

Mrs. Carl Cotton visited her parents in Madison recently.

Mr. and Mrs. Harmon Davis and children, Mr. and Mrs. Hunter Davis and daughter and Mrs. Drew Davis were with Mr. and Mrs. Irvin Simpson, Sunday.

Mrs. Allie Reynolds and sons spent the day Sunday with Mrs. Raymond Davis. Mrs. Minnie McCulley and children and Mrs. Wilbert Bailey and son were guests in the afternoon.

CUSHING

Says Plenty Of Coal

Managing Director of Fuel Association Asserts Report of Impending Shortage Unfounded.

Washington.—Assurance of an adequate supply of coal to meet all domestic requirements during the coming months was given recently by George H. Cushing, managing director of the American Wholesale Coal Association, who declared in a statement that reports of an impending shortage was unfounded. The public, he said, is panic stricken without reason or excuse.

"There is no shortage of coal," Mr. Cushing stated. "There is no danger of any such shortage. Therefore there is a reason, but no excuse, for the current high prices in the open market. The reason is that we have had too much governmental agitation of the danger of a famine."

Prices, Mr. Cushing said have reached the highest peace-time level in history because those who need coal are "frantically bidding against each other in every market."

Declaring that he had investigated nearly every alarmist report, Mr. Cushing asserted that "not one of them will stand scrutiny or analysis." He predicted that the consumption of bituminous coal during the "coal year" beginning last April 1, would not exceed 535,000,000 tons—10,288,000 tons a week.

"The present assumption," Mr. Cushing continued, "is that unless we reach this week consumption in the early weeks of coal year we are running headlong into a shortage of coal. That has not been true in twenty-five years. It is not true this year."

The statement also declared unfounded "alarmist reports that New England, New York and Chicago had in storage only a two days' supply of coal."

Christian Church Notes.

The County Convention of Christian Sunday Schools which will be held tomorrow, July 16th, at Pleasant Grove, promises to be well attended and interesting. The program was printed in last week's Record. Mr. J. A. Heasley, the County President, will preside, Mrs. J. S. Gullett, the Secretary, will record the proceedings. Mrs. L. G. Davidson, Mrs. J. A. Tucker and Mr. and Mrs. E. H. Flourland of the Lancaster congregation will have places on the program. Mr. Geo. T. Simmons of Louisville, will represent the Kentucky Christian Bible School Association. The absence of Rev. U. H. Holder, the minister of the Pleasant Grove congregation, will be a matter of regret to all. He will be on a short visit to his old home in Alabama where he will spend a few days with his mother and brother. The latter is a missionary who will return shortly to his work in Central Africa.

The attendance at the regular services of the Christian church is quite good despite the warm weather. Some are away on vacations but many others from college and school are at home for the summer. The minister is gratified that these young people and others who have not been out of town are faithful in their attendance.

The subject of the sermon for next Sunday morning will be "Conquerors Plus." The public is invited to join in the worship and to hear the discourse.

Ten Thousand Tons of Poison Gas. Poison gas weighing 10,000 tons was supplied to the British armies in the field in 1918.

An Early Start on Sunday. The Puritans, like the Jews, observed the Sabbath beginning with the evening before.

Doesn't Look as Well, Though. Like veal in color, and beef in taste, the camel's hump is a favorite delicacy among the Arabs.

Shooting Fish. The shooting fish brings down insects a distance of from one to four feet by squirting them with water from its mouth.

Old Lumber Best. By a government test in Germany, sound lumber that is 25 years old has been proved materially stronger than new stock.

Homing Umbrella. According to a trade journal the latest fashion in umbrellas is a pigeon's head curved in the handle. This, we understand, is the first step toward a really reliable homing umbrella.—London Punch.

Socrates on Government. Socrates used to say that, although no man undertakes a trade he has not learned, even the meanest, yet every one thinks himself sufficiently qualified for the hardest of all trades, that of government.—Hollingshead.

PAINT LICK

Miss Kate Ely is ill at this writing. Miss Bertha Cosman has returned home.

Miss V. Bloom is the guest of Mr. and Mrs. Ollie Boone.

Mr. H. J. Chesnut and family were visitors in Broadhead, Sunday.

Miss Cynthia Prewitt clerked for Logsdon and Company, Saturday.

Mr. Leslie Sloan was a visitor in Paint Lick the past week.

Porter of the Baptist church of that city officiating. Mrs. Harrington, before her marriage was Miss Adelaide Koch, of Louisville.

Mr. John Williams, Miss Rebecca Williams, Mr. George Spoonamore and family, Mr. and Mrs. Jones Anderson, Mr. and Mrs. O. R. Carpenter, Mr. Jack Whittaker and Mr. and Mrs. John Cress of near Danville were noted among the numerous relatives and friends of the family who motored to Preachersville, Sunday afternoon for the funeral of Mrs. Menefee Elmore.

Mr. and Mrs. John S. Baughman entertained at dinner yesterday at their home on the Lexington road. Those accepting Mr. and Mrs. Baughman's invitation were Mr. and Mrs. A. T. Rushville, Indiana; Mr. and Mrs. Ben Hume, Miss Elizabeth Hume, of Haydon, Miss Katherine Haydon, Mrs. Luther Gibbs, Miss Elizabeth Gibbs, Miss Clara Hume, Mr. and Mrs. W. B. Haydon, of Lexington.—Danville Messenger.

Miss Marilee Lear entertained with a lovely card party Friday morning in honor of her house guests, Miss Hannah Washbourne and Mrs. McMurray-Wilkins. The pretty home was thrown open to the guests, and the profusion of bright flowers made it a vision of loveliness. A delicious two course luncheon was served. As is always the case with affairs at that delightful home, the party was elaborate and perfect in all its appointments. About twenty-five guests were present.

Numerous social affairs were given in Lancaster for Miss Mary Elizabeth James and Miss Elizabeth Clay Highland, the guests of Miss Edna Berkele. Friday evening Miss Ber-

Chiropractic

The power of Nature is within the nerves and is called "nerve impulse." It is the power which supplies life to all organs and tissues of the body. Obstruction of nerve impulse causes disease to the parts which these nerves ramify. Chiropractic Vertebral Adjustments remove this obstruction, thus adjusting the cause so Nature can perform a cure. See your Chiropractor. Consultation and Spinal Analysis Free.

Lipscomb & Lipscomb

SIMPSON HOUSE.

LANCASTER, KY.

Kele gave a beautiful dinner party. The home was attractive with decorations of bright flowers. A six course menu was served. Plates were laid for Misses James, Highland, Minnie Stormes Dunn, Messrs. John McRoberts, Robert Arnold, Detroit, Mich., Willie Mae Elliott, George Swinebroad and Henry Rainey. After the party they attended the dance at Crab Orchard Springs.

Miss Mary Owsley gave an enjoyable picture show party Monday evening in honor of Miss Margaret Faulconer, of Hillsboro, Ohio, and Miss Hannah Washbourne, of N. C. After the show delicious refreshments were served at Stormes Drug Store. Those who enjoyed Miss Owsley's charming hospitality were Miss Margaret Faulconer, Miss Marilee Lear, Miss Hannah Washbourne, of N. C., Mr. Robt. Noland, Mr. Willie Mac Elliott, Messrs. Robert and Gibbs Layton. The party was chaperoned by Mrs. Louis Landram, Mrs. J. M. Staughton and Mrs. E. L. Owsley were also members of the party.

Saturday morning Miss Berkele gave an enjoyable 300 card party in her guests honor. Refreshments were served and the morning was indeed delightfully spent by the following guests: Miss Mamie Stormes Dunn, Elizabeth Gibbs, Charlie Elmore, Mary Mae Walker, Elizabeth Walker, Marilee Lear, Minnie Mae Robinson, Katie Barnes Dickerson, Hannah Washbourne, of N. C., Margaret Faulconer, of Hillsboro, Ohio, Mrs. John Brown, of Louisville Mrs. McMurray Wilkins, of N. C., Mrs. Robert Kinnaird and Mrs. Lige Ford. Saturday night a moonlight picnic

near Kings Mill was given in honor of Misses James and Highland. The affair will long be remembered as most delightful.

Observe the Direction.
A current French scientific journal tells us that, if you wish to enjoy profound and restful sleep, you should lie with your feet to the south. If you would get through a hard day's work with a minimum of exertion, face the west. A pianist plays best when facing the west and worst when facing the south.

Use of Rice Bound to Increase.
The comparatively low cost of rice has made it the staple article of food in Asiatic countries. Rice is also extensively used in all other parts of the world, as it is easily transported and can be held for a considerable period without deteriorating. There is no doubt that its consumption will materially increase with the dissemination of knowledge regarding the variety of palatable ways in which it may be prepared to suit the tastes of the most fastidious.—R. G. Herr, in Grace Log.

Leap Year is Unlucky.
In all probability the theory that leap year is unlucky was coined by the unhappy man who first was called upon to answer a woman's leap-year proposal that he bestow upon her his "mind and fortune or a brown silk gown." The Japanese believe that the two hundred and tenth and two hundred and twentieth days of each leap year are particularly unlucky, while the old English traditions maintain that children born in leap year will be sickly and difficult to raise, and that crops will not prosper, pens and beams "growing on the wrong side of the ped."

Mr. Jesse Mershon and Mr. Fred Sutton made a business trip to Corbin last week.

Master J. W. Holcomb of Burgin spent last week with Mr. B. H. Holcomb and family.

Mrs. Sam Deatherage of Richmond spent the week end with her sister, Mrs. John W. Bryant.

Mrs. O. M. Morvland and son, James Morvland are the guests of friends at Georgetown.

Mr. and Mrs. W. A. Dickerson of Lancaster, spent Monday with Miss Eliza Ison and Mr. Logan Ison.

Messdames R. I. Hurton, John W. Bryant and W. K. Davis attended the chautauqua at Itanville last Wednesday.

Mr. James Moreland of Mississippi

spent a few days last week with his brother, Mr. D. M. Moreland and Mrs. Moreland.

Mrs. Sam Deatherage of Richmond and Mrs. Laura Grimes of Lexington were entertained Monday by Mrs. John W. Bryant.

Mr. and Mrs. Sam Farley and children Mr. and Mrs. C. M. Denn and family were Sunday guests of Mr. and Mrs. A. B. Swope.

Mr. and Mrs. C. H. Rose entertained a number of relatives Sunday. Those being present were: Mr. and Mrs. G. A. Bowling and son, Green, Dr. and Mrs. Sam Rose of Winchester, Mr. and Mrs. Cleveland Rose of Stanford, Mrs. Jamie Rose and Mr. Will Rose.

Quite a number from here attended the Chautauqua in Lancaster, those being: Mr. and Mrs. J. C. Williams and family, Dr. and Mrs. H. A. Dawes, Mr. and Mrs. J. Hogan Ballard, Miss Amy and Zella Dawes, Mary Belle Holcomb Maymie Ballard, Stella Mae Brown and Mr. Colivar Dawes.

STONY POINT.

Mrs. R. Z. Price is on the sick list.

Miss Odessa Colon is visiting relatives at Manse.

Rev. Holder filled his regular appointment at Fair View Church Sunday.

Miss Rennie Metcalf is visiting her sister, Mrs. Walker Burnside of 1860 Ridge pike.

Misses Mary Price and Beatie Barr spent the night with Mrs. Stone Clayton Saturday.

Mr. and Mrs. Dewey Price were the week end guests of his parents, Mr. and Mrs. R. Z. Price.

Miss Cora Fletcher has returned home after spending a few days with her sister, Mrs. Clayton Anderson.

Little Miss Christine Price has returned home after a two weeks visit with her brother, Mr. Dewey Price.

Mr. and Mrs. Claud Gillen of St. Louis, Mo., has returned home after a short visit with their uncle and aunt, Mr. and Mrs. O. M. Barr.

TO CLOSE OUT 500 PAIR LADIES SHOES

Having definitely decided to discontinue handling Ladies Shoes we offer entire stock of shoes, oxfords and pumps, half of which are Grover's hand-made goods at much less than Manufacturer's first cost. But they must be sold regardless, so our loss will be your gain. In fact you can purchase these shoes cheaper than you can have your old ones half-soled. They will be sold on the Piggly Wiggly style, each pair having size and price marked on same. You can't afford to miss this great shoe opportunity.

In order to help out the Men a little we will at the same time give them some real bargains as follows:

100 pairs of Men's Work Shoes, valued up to \$5 at \$2.90.

Every Pair of Men's Dress Oxfords reduced from 20 to 40 per cent.

You should purchase these very liberally, as you will live a long time before you see any more cheap shoes. A hint to the wise is sufficient.

TERMS STRICTLY CASH, OF COURSE. NO GOODS LAID ASIDE OR SENT OUT ON APPROVAL.

Parks and Hendren

Home of Better Shoes. Danville, Kentucky.

BUCKEYE

Mr. Ollie Hogie sold a mare to Mr. Geo. Ray for \$200.

Mr. J. P. Prather is visiting relatives in Madison County.

Mr. Sale Hurt is at Dry Ridge taking treatment for rheumatism.

Rev. D. F. Sebastian and wife of Paris attended church here Saturday evening.

Miss Christine Morford and brother, Thomas, of Nicholasville were here Sunday.

Miss Beulah May will lead the prayer meeting Wednesday evening, subject, "Obedience."

Mr. Wilbert Ray and family of Madison were guests of Mr. and Mrs. Lenzy Ray, Saturday and Sunday.

Misses Thompson Davis, Geo. Ray and Dan Ray delivered several hogs Friday to Mr. V. A. Lear at Lancaster.

Misses Flora and Christine Price, of Hackley have returned home after a weeks visit with Mr. and Mrs. Dervey Price.

Rev. Strother of Lancaster, delivered two splendid sermons here Saturday and Sunday. Wish he could be with us every Sunday.

Miss Verna Ray came home Monday to enter school here after a

several weeks visit with her grand mother, Mrs. Wiley in Madison Co.

Mrs. Hiram Ray, Mrs. Martha Anderson, Mrs. Nora Teater, Misses Sallie Lou Teater and Ethel Ray were guests Thursday of Mr. and Mrs. Jim Nave, near Stanford.

Mixture of Civilizations.

Key West, Fla., is a quaint mixture of American and Latin-American civilization, with about equal parts of each. Harry A. Franck writes in the Century Magazine. The Spanish tongue is heard there fully as often as English, and, as in the towns along the Mexican border, the official tongue is bilingual, and Americans from the North are frankly considered foreigners by the Colonized rank and file.

Town of Historic Interest.

While the name, Norristown, calls to mind that this place is the home of the state institution for the insane, it is also well to remember that it is historically interesting. Here can be seen the old Swedes' ford of the Schuylkill river, where American and British armies crossed many times during the Revolution. On Main street is located the home of Governor Hartman, Here, too, is the Seven-Star tavern, established in 1754 and famous during the Revolutionary war and on this same street was located the home of General Hancock, of Civil war fame.—Philadelphia Record.

Whale Teeth Used as Currency.
Whale's teeth pass as currency in the Fiji Islands. They are painted white and red, the red teeth being worth about twenty times as much as the white.

How Bridal Veil Originated.
The bridal veil is said to have originated in the ancient custom of performing the marriage ceremony under a square piece of cloth, held over the bridal couple to conceal the blushes of the bride. At the marriage of a widow it was not used.

Rouge Withers Greek Girls.
Although most Greek girls are naturally very pretty, they begin to paint and powder from a very early age—the cheeks bright red, the eyebrows and lashes deepest black, and veins darkly blue. The result is that the are withered old women at forty, and thus nowhere are uglier females to be found than beneath the blue skies of this classic land.

Tinted Literature.
"Your narrative is too highly colored," remarked the editor, returning the bulky manuscript. "In what way?" inquired the disappointed author. "Why," replied the editor, "in the very first chapter you make the old man turn purple with rage, the villains green with envy, the hero turn white with anger, the heroine turn red with confusion and the coachman turn blue with the cold."—Tit-Bits.

90 ACRES

FAMOUS TOBACCO LAND

known as the Bob Burton land, now owned by J. W. Smith at

AUCTION

on the premises, six miles from Lancaster, on Buckeye pike, close to graded school.

Saturday, JULY 24

10 A. M. rain or shine

This is a fine sandstone tobacco land, in high state of cultivation, will be sold in three tracts, with two complete sets of improvements. 1918 tobacco crop of this farm averaged 70 cts.

TRACT No. 1—of about 27 acres, long pike frontage, new 7 room dwelling, frame, weatherboarded, plastered, painted, large new tobacco barn, high and airy with splendid surroundings, large shade trees and HOME you'll see and one to make money on.

TRACT No. 2—Consists of about 50 acres fine land, with 2 four room houses and one of the best combined tobacco and stock barns in the county, one good silo, water at barn, right on pike and beautifully situated, must be seen to be appreciated.

TRACT No. 3—Consists of about 15 acre block between the above two tracts, nice pike frontage good land, everlasting water, and would make some one a dandy small farm "out on Broadway" where they advance in value continually.

The owner has purchased the Robert Gulley home tract to which he will move, so look this property over. It is up selling and is the kind to buy, we advertise no other than sellers.

Gold money given away. Terms Liberal and announced on day of sale. Ladies especially invited.

For further particulars, see the owner on the premises, or Bill Whittaker, at Hackley, or

D. A. Thomas

Small Things of Great Moment.
A piece of twine that fell into the steering gear of a truck, after having cost the company \$10,000 for repairs and delay. A word carelessly dropped will sometimes cost a life of regret.

Oil Produces Life's Necessaries.
It has been said that every possible necessity of a man's life, save the water he drinks and the air he breathes, may be supplied, either directly or indirectly, through the use of petroleum products, and even water may be pumped by a gasoline engine.

Prepare for "Leisure Years."
Long life is not worth while unless it is active. Merely to exist in dull and passive contemplation of the immediate environment makes the verdict, "Better dead." Men and women who hope to live long and retain their faculties should, if a Baltimore physician is to be believed, take a little thought in advance for the work of the "leisure" years.

HOUSEKEEPER MAY DETERMINE WHETHER SHE IS GETTING MEAT OF DESIRABLE QUALITY

Three Grades of Beef—Note Percentage of Meat to Bone Between "Prime" on Left and "Medium" on Right—(A) Front Ribs; (B) Back Ribs.

Prepared by the United States Department of Agriculture.

When the retail meat dealer buys from the wholesaler, he does not depend altogether on the wholesaler's honesty and good faith to secure the grade of meat he wants for his trade. Instead, keeping in mind certain points and characteristics which determine grades of beef, the retailer, before he buys and pays for it, decides for himself whether he has been given what he ordered.

The housekeeper should be quite as familiar as the butcher with the various grades of beef. Few housekeepers, however, have this knowledge. Even those women who pride themselves that "cotton mixed" is not sold them for linen, buy beef, week after week, year after year, and depend altogether on their butcher's honesty. Not until it is cooked and served do they know whether they have been given the "choice" meat they asked and paid the price for, or only that of "medium" or "common" quality. Linen buying is only occasional, but meat buying is daily, and every woman should be familiar with the different grades of meat. Toward this end the Bureau of Markets, United States department of agriculture, has defined the four grades of beef.

How Beef is Usually Graded.

The "choice" grade of beef denotes the best quality usually found in the markets. Only a limited amount of what is known as "prime" beef is offered in most markets. This grade is usually offered in limited quantities during the Christmas or holiday seasons, and immediately following livestock shows. "Choice" beef has a moderately even covering of fat on the outer surfaces. This fat is smooth in appearance and white in color, but is not in excessive amounts. The color of the lean meat is light red, with traces of fat distributed through the

lean on all cuts, which are taken from the loin, ribs and some parts of the round. Choice meat is firm to the touch and of fine grain. There must be no watery appearance on the freshly cut surfaces.

The "good" grade of beef is next in quality to "choice" and may differ slightly in all points or correspond in some points to "choice" and differ materially in others. The covering of fat is not so smooth and uniform, but must be white in color and dry in appearance. The color of the lean meat in this grade also varies slightly and may be of darker hue than the "choice" grade, but it is not dark. "Good" beef is of smooth grain and has traces of fat, which is white or creamy in color, distributed through the lean.

Most Beef is "Medium."

The bulk of the beef offered for sale in most markets is of "medium" grade. In this there is usually very little and often no covering of outside fat except on the loin and rib cuts. The fat is not evenly distributed. During the summer and fall months "medium" grade beef has a watery appearance and the color of the lean meat varies considerably, but is usually dark, even when freshly cut. "Medium" beef has a tendency to turn still darker very quickly after being cut. The grain is coarse and not uniform, and there are no traces of fat distributed through the lean.

The "common" grade is the lowest quality of beef offered for sale in a fresh condition to the trade. One of its prominent features is the high percentage of bone in proportion to the meat. There is only a slight covering of outside fat on the rib and loin cuts. "Common" beef has a flabby appearance, is dark in color, and coarse in grain. A few traces of fat may be discerned, but they usually are of a yellow color and are unevenly distributed.

SELECTION AND CARE OF USEFUL UTENSILS

First Decide if Device Will Pay for Itself in Long Run.

Often They Are Cumbersome and Difficult to Clean—Few Drops of Water Sprinkled on Duster Takes Up the Dirt Easily.

(Prepared by the United States Department of Agriculture.)

Before buying any household device, decide whether it will pay for itself in the long run by saving time and strength or wear and tear, or if it will make some especially disagreeable task less unpleasant. Devices which can be used for many purposes are seldom employed by the housekeeper for more than one, and often they are more cumbersome to handle and less easily cleaned.

Long handles on brooms, brushes, and dusters save the back, the office of home economics kitchen of the department of agriculture suggests.

A cleaning cloth should be soft and loosely woven, so that it will take up dirt easily and itself be easy to clean. A duster takes up dirt better if a few drops of water or oil are sprinkled on it. Beware of too much moisture or oil, for it leaves streaks. For wiping very dirty places use soft paper, cotton waste, or rags, which may be thrown away. Keep the cleaning things together in a convenient place. Put them away clean. Hang brushes, mops and brooms when not in use.

Clean string mops by shaking over a damp newspaper or a can. Never shake in the open air unless you are sure the dirt will not trouble you or your neighbors. Wash occasionally in hot water with washing soda or soap and dry quickly. Sprinkle a few drops of oil on the oil mops after cleaning.

Clean carpet sweepers frequently. Empty the box on damp newspaper and use old scissors and buttonhook or comb to remove the hairs and dirt on the brushes. Keep the bearings oiled.

Useful Vacuum Cleaner.

A carpet sweeper or a vacuum cleaner should be used in the daily cleaning of the carpets and rugs. A vacuum cleaner operated by hand or electric power removes practically all the dust and dirt from carpets and rugs in dustless manner.

HOUSE CLEANING SIMPLIFIED

Easier to Keep Dirt From Walks, Steps and Porches Than to Clean Rugs and Carpets.

(Prepared by the United States Department of Agriculture.)

Keeping the dirt out of the house as far as possible is the first step in simplifying house cleaning. It is easier to keep walks, steps, porches, and sills clean than to remove the dirt from rugs and floors after it has been tracked inside the house. Clean shoes and rubbers mean less dirt for the housekeeper to combat.

When cleaning, remove the dust thoroughly. Right methods mean removing, not scattering the dust about to settle again.

Do the heavy cleaning a little at a time and avoid the spring and fall house cleaning.

Use water and cleaning agents sparingly. Too much of either injures wood and all finishes as well as weakening glue, paste, and cement. Always rub until dry the surface which has been dampened.

Train the family to leave things in place and in good condition. Good habits are worth cultivating, and this one also simplifies the work of the housekeeper.

Slices of fresh cucumber are a very good tonic for the skin.

Always empty the water out of a kettle before refilling it.

Potato salad should be made of cold boiled, not baked, potatoes.

Iced tea is improved by some slices of orange as well as lemon.

The pantry shelves are best covered with white oilcloth, cut to fit.

The stove will keep its polish if it is rubbed daily with a newspaper.

Use borax in tepid water for washing silk handkerchiefs, iron dry.

A paint brush is excellent in removing dust from carvings on furniture.

One Handsome Residence

20 Building Lots and 3 Small Tracts

AT

AUCTION

Tuesday, July 20

What Appealed to Robert.

His father wasn't anxious to have
Robert play with a certain uncle in
the neighborhood whose language
wasn't always proper, so he said,
"Robert, seems to me that boy always
has a dirty face; if I were you I'd
play with someone else that is clean-
er." To which Robert responded,
"Why, daddy, I don't need to look at
his face—but he's got the best legs on
the ball team."

On Today's
table of po-
sitive de-
sires. The vision of
time to do tomorrow's should be
done today. That more convenient
time seldom ever comes. Shakespeare
emphasizes the idea when he says:
"You can't turn the clock with the wa-
ter that is past." Another writer has
said: "Procrastination is the thief of
time." It's a mere waste to conscience,
and tomorrow with its own quota of
jobs has no time nor room for what
should have been done yesterday.—
Grit.

Pigmy Race.

The natives of the Andaman Is-
lands, bay of Bengal, average three
feet eleven inches in height and
weigh under seventy pounds.

The "Burning Stone."

Sulphur is one of the oldest known
elements; the ancient Assyrian al-
chemists regarded it as the principle
of combustion on account of its own
inflammability, and termed it "brim-
stone," meaning literally burning
stone.

Superstitions of the Great.

Dr. Samuel Johnson, so it is re-
corded, would never enter a room left
foremost, and brave Marshal Saxe
was in terror at the sight of a cat.
Peter the Great was in a tremor of
fear if he had to cross a bridge, and
Neyron turned pale if he spilled salt at
the table.

Beginning of Great Industry.

In 1684 a Portuguese bark, home-
ward bound from Madagascar, driven
from her course by tempests, was
forced to take shelter in the harbor
of Charleston, S. C., and the captain,
in return for courtesies extended him,
presented Gov. Landgrave Smith with
a bag of rice seed, which Smith plant-
ed that year in accordance with the
captain's instructions, and from this
crop sprang the present tremendous
rice industry in the southern United
States.

The Bishop's Boys.

The first bishop of North Carolina,
John Stark Havenscroft, generally
spoke of the clergy under him as if
they were his own children and Mr.
Marshall Delaney Hayward in his
book, "Lives of the Bishops of North
Carolina," says that Bishop Havens-
croft loved them like children, and
was loved in return as a father is
loved. "I wouldn't give my fourteen
hogs for your whole diocese," was his
proud declaration to a rector of a
fashionable church in New York.

Concealed in Earth's Bosom.

The earth conceals many wonderful
objects, both natural and man-made,
that are being discovered from time to
time. Remains of prehistoric animals
and plants, skeletons and mummies,
coins and jewelry, statues, old records,
aboriginal implements and toys, even
whole buried cities have been found
from time to time. Mammoths have
been unearthed whole in frozen Si-
beria. Their bones or those of their
relatives, the mastodons, have been
dug out in Alaska, in New York state
not far from the Hudson river, and in
New England.

Largest Membership.

The French Legion of Honor has a
much larger membership than any oth-
er prominent order.

Boers Lang Opposed Railways.

For a long time the Boers refused
to sanction the construction of rail-
ways in the Transvaal on the ground
that nowhere were such contrivances
mentioned in the Bible.

Wife Is Boss in Abyssinia.

Abyssinia, it is said, gives great
authority to the wife. It is her privi-
lege to abuse her husband, and she
can divorce him at pleasure, where-
as the husband must show cause if
he wishes to divorce his wife.

Proper Care of Tools.

All good tools should be wrapped
up, otherwise they will rust, and rust
dulls their cutting edges. The care-
ful carpenter wraps his tools in a
woolen cloth, well oiled. The care-
ful chauffeur wraps all polished tools
before putting them in the tool box
and keeps them away from the stor-
age battery, the fumes of which will
quickly rust them.

Cleaning Books.

Most family libraries are disfigured
by one or two once lovely volumes in
unpractical bindings of pale silk or
white leather dimmed by grime. Art
gum or a sort of kneaded eraser may
clean them. If not, try fine powdered
pumice, lightly applied with a clean
chamois. This is what picture deal-
ers use to clean the margins of old
prints. It roughens the surface less
than rubber.

Hindu Youth Precocious.

A tourist traveling in India wrote
home that he was astonished by the
precocity of the Hindu children, says
the Home Journal. Many of them
are skilled workmen at an age when
other children are learning the alpha-
bet. One of the most expert carvers
in wood he saw was a boy of seven,
and many of the handiwork and most
costly rugs and carpets are woven by
children not yet in their teens.

Sack the Higher Life.

Whatever you do, be greater than
your calling; let your manhood over-
top your position, your wealth, your
title. Masterful living, constant growth
toward a higher life, are the great
ends of human existence. Your call-
ing should be the great school of life,
the great man-developer, character-
builder, that which should broaden,
deepen and round out into symmetry,
harmony and beauty all the God-given
faculties within you.—Orison Swett
Marble in Chicago News.

There Was a Reason.

Mary returned from Sunday school
and complained that one of the little
boys had snipped her. The following
Sunday the mother asked her if the
boy had snipped her again. "No," re-
plied Mary. "I didn't call his little sis-
ter a monkey today, so he didn't snip
me."

Peculiar Superstitions.

No one can give any reason why a
horseshoe is considered lucky. The
original belief was that it kept out
witches. A novel wart cure is the
placing of a number of pebbles in
a bag, corresponding with the num-
ber of warts. The warts are sup-
posed to disappear when the bag is
thrown away, and the person who
finds the bag is expected to find the
warts as well.

Nature's Wise Supervision.

The part important played by the
weather as a means of preventing the
too rapid development of the plant life
of the world can be realized only when
we consider the vast number of seeds
produced. If conditions of the atmos-
phere favored a more even tempera-
ture all over the earth, as was proba-
bly the condition in the early history
of the planet, there would be fewer
varieties of plant life, because the
more rapidly producing plants would
crowd out the others.

Orchid Crossbreeding.

While orchids from the wilds have
remarkable and interesting charac-
teristics, they are being rivaled and sur-
passed by new forms produced by
hybridization in the greenhouses of
experts. Now, the hybrids are many
in number and are supplanting the
older varieties in part because of
their exquisite beauty of color and
form, their increased fragrance and
their greater ease of cultivation. It
is slow work, the crossbreeding of
orchids, but it is marvelously fasci-
nating.

Why Dog's Nose Is Cold.

Tradition gives a droll explanation
of the ever-chilly nose of the canine:
Noah had some anxious and annoying
moments when he was trying to coax
the animals into the ark. They ran
hither and thither and gave him no
end of bother until he had a dog chase
them, making them go where they be-
longed. Attending strictly to his duty
and not giving up until the last pig
and hyena were safely inside the ark,
the dog himself was the last to get
aboard. So he was obliged to squeeze
himself in with his nose in the water
during the whole of the voyage, an
adventure that has made the noses of
his descendants cold and wet forever-
more.

After the Night, the Morning.

The eternal stars shine out as soon
as it is dark enough.—Cecily.

Words of Wise Man.

First get an absolute conquest over
thyself and then thou wilt easily gov-
ern thy wife.—Pulley.

Weather Affects Watches.

A watch will often break down un-
expectedly owing to a sudden change
in the weather breaking the main-
spring.

Longfellow in Westminster Abbey.

Among the memorial tablets or stat-
ues in Westminster abbey stands a
bust of Longfellow, the only American
who has been so honored.

Near Enough.

A certain retired British colonel tells
a story of a dusky bishop who once
went to a function in town. He gave
his name to the fussy as the bishop
of Honolulu, but the man failed to
catch it, and believing that in the
case of a negro bishop all things were
possible, announced him as "the bish-
op of Hallelujah!"—Exchange.

Painting.

The powers exerted in the mechan-
ical part of the art have been called
the language of painters; but we may
say, that it is but poor eloquence
which only shows that the orator can
talk. Words should be employed as
the means, not as the end; language
is the instrument, conviction is the
work.—"The Discourses of Sir Joshua
Reynolds."

Food Value of Potatoes.

That potatoes differ widely in food
value is shown by a report of the gov-
ernment's scientific committee. It is
laid down that the most useful pota-
to for food is the one which contains
the largest amount of dry matter.
Where two varieties are practically
equal in this respect the nitrogen they
contain enters into the assimilation of
their feeding quality.

Famous Small Bells.

The source of the dinner table "call
bells" is not always traceable. Some
come from old churches, where they
have served as altar bells, especially
those that have Latin quotations on
the medallions on the sides of their
cup-shaped gongs. Those that repre-
sent famous personages are after the
fashion of the period in which their
deeds made them familiar figures in
the public eye. Some are patterned
after the bells in certain famous
chimes—like the copies of bells from
the famous Miller collection in Cali-
fornia.

THIRTY-FIRST YEAR

LANCASTER, KY., THURSDAY AFTERNOON, JULY 15, 1920.

NUMBER 17.

Just received a car load of the celebrated light running

BROWN WAGONS.

Come in and see them at the following prices which are below what wagons would cost us on the market today.

3 inch, 2 by 5-8 tire	\$155.
3 1/4 inch, 2 by 5-8 tire	\$160.

Goodloe & Walker Bros

A Sure Thing That

Is Sure

Profits come to the men who take advantage of sure opportunities. Buy Liberty Bonds now, while market prices are favorable. They are "backed" by the nation's strength.

Daily Thought

Where should the scholar live? In solitude or in society? In the green stillness of the country, where he can hear the heart of Nature beat, or in the dark, gray town where he can hear and feel the throbbing heart of man?—Longfellow.

THINK OF IT

50,000 Persons Publicly Recommend Our Remedy. Some Are Lancaster People.

Over one hundred thousand have recommended Duane's Kidney Pills. For backache, kidney, urinary ills. Fifty thousand signed testimonials are appearing now in public print. Some of them are Lancaster people. Some are published in Lancaster. No other remedy shows such proof. Follow this Lancaster man's example.

W. S. Carrier, merchant, Public Square, says: "I had dull backaches that bothered me, especially during the night and my kidneys acted irregularly. I used Duane's Kidney Pills, procured at Storm's Drug Store and the backache and other signs of kidney trouble disappeared. I have had no return of the trouble."

Price 60c, at all dealers. Don't simply ask for a kidney remedy—get Duane's Kidney Pills—the same that Mr. Carrier had. Foster-Williams Co., Mfrs., Buffalo, N. Y.

Will It Pay?

That is the first thing we think about when we go to invest a dollar.

Then comes the question—Will it Pay to drive to Bryantsville to do your trading? We know we can save you money on the following and many other things not listed in this ad.

Deering Binder Twine 17c per pound.

New car load of wire fence, which is going at the following prices:

Four foot No. 9 top and bottom . . . 65c.

Four foot, heavy weight . . . 75c.

Four foot, 6 in. stay heavy weight . . . 85c.

Heavy cattle barb wire \$6 for spool 80 rd

Heavy Hog barb wire, heaviest made \$6.50 per spool of 80 rods.

Fresh car load of salt at \$3.48 per seven bushel barrels.

SUFFRAGE

Would Hurt The South

Says Miss Brock, Former Leader, Who Asserts That Right to Vote "Coarsens And Cheapens Women"

Knoxville, Tenn.—Miss Annie Brock, of Los Angeles, former equal suffrage leader, in a letter to W. K. Anderson, representative in the lower house of the Tennessee Legislature, urges him to support ratification of the suffrage amendment. Suffrage, she says, "coarsens and cheapens women." She expresses regret as to her former activities in its behalf, saying that since suffrage has been granted there has been an alarming increase in immorality, divorce and murder in California.

The letter follows: "I was one of the prominent workers who helped to bring suffrage to California, and I regret it."

"A year in politics has taught me that women are intolerant, radical, revolutionary and more corrupt in politics than men; also all this so-called reform leads to the Socialist cooperative commonwealth."

"Since suffrage there has been an alarming increase in immorality, divorce and murder, in California."

"Woman suffrage has made cowards and puppets of men. It has coarsened and cheapened women. Were the men to vote on woman suffrage in California today, it would not carry."

"Suffragists asked for suffrage that they might get only good men in office; now they clamor for a fifty-fifty show for all officers."

"I shall do nothing forever for the past I played in bringing suffrage to California."

"Please urge your colleagues not to do what will bring regret and disaster but to stand for that 90 per cent of women who do not favor suffrage but are glad to trust all politics and governmental affairs to their husbands, fathers, sons and brothers."

"To the South woman suffrage would bring more than calamity."

What It Cost a

Candidate.

Hopkinsville, New Era.—Now that politics is warming up, this tale, from the scrapbook of a Hopkinsville lady, is apropos. It's the sworn statement of a Georgian who has been in the primaries for County Commissioner:

Lost 1,349 hours of sleep thinking about the election. Lost two front teeth and a whole lot of hair in a personal encounter with an opponent. Donated one beef, four shoats and five sheep to a county barbecue. Gave away two pairs of suspenders, four calico dresses, \$5 cash and thirteen baby rattles. Kissed 125 babies. Kindled fourteen kitchen fires. Put up four stoves. Walked 4,070 miles. Shook hands with 9,508 persons. Told 10,101 lies and talked enough to make, in print, 1,000 volumes. Attended sixteen revival meetings and was baptized four times by immersion and twice some other way. Contributed \$50 to foreign missions, and made love to nine grass widows. Hugged forty-nine old maids. Got dog-bit thirty-nine times and was defeated."

To The Citizens of Lancaster, Ky.

Honorable Mayor, City Council and People of Lancaster, Ky:—

Whereas, the franchise now held by us is void by reason of being in conflict with the State Constitution, and

Whereas, we have no franchise for operating our plant in the City of Lancaster, Ky., because the same is void as aforesaid, the City Council of the City of Lancaster, Ky., and the public generally are hereby notified that we will on August 1st, 1920, or as soon thereafter as practical, move all our poles and electrical equipment from the streets of the city of Lancaster, Ky.

This notice is given as a legal notice, as we understand that reasonable notice must be given before we can remove said property and discontinue said plant.

We are willing to do anything we can to co-operate with the city in securing a franchise for the purpose of furnishing electric light and power to the citizens of the city, but we can not continue it further without expensive additional equipment, and this we can not do at the present rates and without a legal franchise protecting us in our rights.

Done this April 26th, 1920.
Respectfully submitted,
BASTIN BROTHERS,
By H. V. Bastin.

U. OF KY. COURSE On School Laws

Attendance Officers And County Superintendents Will Be Pupils August 2nd. to 14th.

Kentucky's Department of Public Instruction, in cooperation with the University of Kentucky and the Lake Division, American Red Cross, will conduct a school for attendance officers and county superintendents at the University Aug. 2 to 14, at which will be discussed the various problems of school attendance and those especially growing out of the compulsory attendance law of Kentucky.

The entire field of compulsory attendance in the United States, child labor laws, national and State; the meaning of the compulsory attendance law and methods of enforcing it; problems of juvenile delinquency and dependency; treatment of first offenders and suggestions for solving the problems will be among the topics.

Officers of the school are Superintendent of Public Instruction, Geo. M. Colvin, President Frank L. McVey and Professor C. B. Cornell, of the University. Professor Cornell will also represent the Red Cross.

Rooms may be obtained at Patterson Hall and there will be no fees. Meals may be obtained at the University cafeteria and all who reserve rooms at Patterson Hall must furnish their own bed linen.

The new school is intended to give a good start to the operation of the new county attendance officer law, which goes into effect with the opening of the schools this year.

Lecture Topics

Status of compulsory attendance in the United States.

School legislation in Kentucky.

Child labor laws—National and State.

The meaning of the compulsory law and methods for enforcing it.

The function and scope of the attendance officer.

Cooperation between attendance

officer, teachers, county superintendent and county board of education.

Relation of attendance officer to other county and State officers and officials.

Methods of cooperation with local agencies.

Truancy: Causes and Cures.

Value of social service training in enforcing school attendance.

Relation of school attendance to public health.

Relation of school attendance to farm ownership.

School attendance and citizenship.

The attendance officer a medium between home and school.

Medical inspection and school sanitation.

The value of community organizations in school attendance.

Economic aspects of non-attendance.

Rural recreation.

Good roads, transportation and consolidation.

Problems of juvenile delinquency.

The attendance officer a probation officer.

Dependency: Methods of caring for the feeble minded insane and epileptics.

The attendance officer a public welfare agent.

Method of treatment for first offenders.

Kentucky's problems. Suggestions for solving them.

Preliminary organization and office set-up.

Reports, statistics, records and files.

Problem of Ancient History.

Another thing we never could understand was why the old-fashioned man who had snakes in his boots staggered more than he himself.—Dallas News.

All Learn Jiu-Jitsu.

Japanese children begin to study Jiu-Jitsu in their earliest years, for it is a system of physical culture, hygiene and ethics, besides being a form of self-defense and offense. A series of exercises to give strength and flexibility to the limbs are first taught; later the pupil is shown the fine art of using an adversary's strength against himself, which is the real principle of Jiu-Jitsu.

Bad Habits in Canaries.

When a canary bird plucks feathers from the young birds, place them in a small nursery cage suspended from the side of the breeding cage in a manner that will allow feeding between the wires, as the young birds should not be removed entirely from their parents until they are able to crack the food upon which they must feed.

A Plan That Will Work

Ask you employer or broker to sell you Liberty Bonds on installments, and take advantage of the opportunity presented by present market prices. Or save up until you have enough to buy a \$50 bond. War Savings Stamps will help you save.

As Certain As Fate

"Age, there's the rub," you think when you dream of Aladdin's slaves. Aladdin never had slaves half so powerful as the man who has savings. Begin today with War Savings Stamps, "always worth more than they cost you."

The Sunflower.

The modern sunflower was formerly called adwese, the sun follower. In those days the married was called the sunflower.

The Black-Cap.

The black-cap, one of the songsters of England, sings a sweet, full, clear but short strain, and expresses a great variety of tones, surpassed only by the nightingale. Black-caps are most frequently found in orchards and gardens.

Sugar Cane.

The leaves of the sugar cane are long and narrow, and the stalks are hard and thick. It looks very much like growing corn, but grows somewhat taller—at times as high as 15 to 18 feet. After the cane ripens, it is cut and taken to a sugar mill.

Walk Around a Ring.

A Tennessee investigator made a series of more than fifty experiments for the purpose of disproving the assertion that blindfolded persons walk in circles, but he was unable to do so, for all the persons in the tests departed from the straight line as they walked away from the starting point.

Bad Habits in Canaries.

When a canary bird plucks feathers from the young birds, place them in a small nursery cage suspended from the side of the breeding cage in a manner that will allow feeding between the wires, as the young birds should not be removed entirely from their parents until they are able to crack the food upon which they must feed.

EVERY DAY A BARGAIN DAY AT SCOTTS BIG STORE

OTHERS ADVERTISE 15 DAY SALES.

WE HAVE 365 SALES DAYS

Every Day in the year is a Bargain Day at our store, and we are 10 per cent cheaper on every article in our store, than the other fellow who advertises 15 Day Sales.

Come and get our prices and be convinced. We can save you money on DRY GOODS, NOTIONS, GENTS FURNISHING GOODS, SHOES, HATS, CAPS, HARDWARE, TINWARE AND GROCERIES.

We have about 100 PAIR of MENS and LADIES SHOES and SLIPPERS that we will sell at ONE HALF PRICE and every pair of SHOES in our entire stock is 25 per cent cheaper than the cheapest sale prices.

We are headquarters for Paris Green, Fruit Jars, Extra Tops and Rubbers for same. Our prices are right at all times on every item.

We have neither Mama nor Dad to pay, but we have bills to pay. Come and see us, you will get a fair deal.

Yours for business,

Largest Known Potato.
The department of agriculture says that the weight of the largest potato recorded in its office is between seven and eight pounds. There may have been larger ones produced, but the department has no record of it.

Hazelwood Sanatorium
For the Treatment of Tuberculosis
Maintained by the Louisville Anti-Tuberculosis Association for the adequate treatment of tuberculosis in all its stages at less than cost. Rates \$15.00 per week, including board, medical attention, laundry, etc. High ground commanding extensive view. Delightful surroundings. Special rates for outpatients; two treatment if necessary, balances payable. Good for European. Bunkies to Physicians in Charge, Hazelwood Sanatorium, 11 miles S. Louisville, Ky.

EFFICIENCY OF ILLINOIS FARMS COMPARED.

Corn Harvester in Operation—Where Conditions Are Favorable the Corn Binder Increases Efficiency of Man Labor About 50 Per Cent.

(Prepared by the United States Department of Agriculture.)

The relative efficiency of plows of different sizes, the value of the tractor compared with horses, the saving of fuel by corn binders, hay loaders, and numerous other implements, and other facts bearing on farm management are discussed by specialists of the office of farm management, in a bulletin recently issued. The publication discusses in detail the standard day's work in central Illinois; that is, the amount of work that the 600 farmers included in the investigation ordinarily do in that part of the work day devoted to a given farm operation, such as the number of acres plowed with a given equipment. In some instances the rate of work is given in the bulletin in number of minutes per acre, as in loading and unloading hay, or hauling and spreading manure.

From the figures published one may get a good idea of the rate at which different farm operations are done in the parts of the corn belt in question. For example, it is shown that one man does from 70 to 80 per cent more with the 28-inch horse-drawn gang plow than with the one-bottom 16-inch plow. Figures are given for spring and fall plowing, harrowing, planting, cultivating, harvesting, husking, seeding, unloading ear corn, unloading oats, loading and unloading hay, and hauling and spreading manure. The bulletin is entitled "The Standard Day's Work in Central Illinois." Copies may be had by addressing the United States department of agriculture, Washington, D. C.

The farms represented by this inquiry are fairly typical of those throughout the middle western states, since the average crop area is 167.4 acres and an average of 32.1 acres is never planted to crops. Corn is the principal product, at least one-half of the crop area being devoted to it, and the oat crop is second in importance. The ground cultivated in most instances is level, and so represents easier working conditions than rolling or rugged country.

The average time spent in the field, exclusive of the time used in going to and returning from the field, at morning, noon, and night, is reported by these men as ten hours and ten minutes per day devoted to spring field work and corn cultivation; nine hours and 55 minutes for haying and grain harvesting; nine hours and 30 minutes for fall plowing and preparing ground; and nine hours and 20 minutes for corn harvest.

Important Facts Emphasized.
Among the significant facts brought out by this inquiry may be mentioned the following:

Under conditions where the use of a two-row corn cultivator is practicable, this machine enables one man on these farms to cover nearly twice as much ground per day as with a one-row cultivator. Three horses are most commonly used on the two-row cultivator and the addition of a fourth horse apparently increases but little the amount of ground covered per day.

These farmers find that the use of a corn binder increases the efficiency of man labor 50 per cent over that achieved when cutting and shocking by hand.

Eighty bushels was an average day's work on these farms for one man when husking corn from the standing stalk by hand.

The use of a portable elevator reduces the time required to unload grain into the bin by about 75 per cent.

The use of a hay loader reduces by about 25 per cent the time required to put on a load of hay. The amount of labor required for unloading into the mow is only a little more than half as great when a hayfork is used as when the work is done by hand.

The men in this territory who use manure spreaders haul and spread a given amount of manure in less than half the time required by men who haul in wagons and spread by hand.

A large majority of the men reporting broadcast their small grain, using engine seeders attached to the top of an ordinary wagon. Only about 25 per cent of the farmers reporting own grain drills.

The bulletin analyzes each field operation from the standpoint of man-labor requirements, horse-labor requirements, size of machine, etc. The manner in which the data on plowing have been summarized is typical of the way in which several subjects are treated. About 80 per cent of the farmers reported the use of sulky

plows, about 50 per cent stated that they use horse-drawn gang plows, and 14 per cent reported the use of tractors for plowing.

16-Inch Sulky Plows Popular.
A large majority of the farmers use 16-inch sulky plows, nearly all of them with three horses in the spring. Three acres is an average day's work for this outfit. For the comparatively few farmers using 14-inch sulky plows with three horses in spring, plowing about three acres is an average day's work. While theoretically the 16-inch plow should cover about 15 per cent more ground in the same length of time, this apparently has not been found true in practice.

Four-Horse Teams Preferred.
The greater number of four-horse teams and even some five-horse teams on 14-inch sulky plows for fall plowing is accounted for by the fact that plowing in the fall is usually about one inch deeper than in the spring, and also by the fact that the ground is generally dry and hard to turn. On an average, outfits of the same size cover about a half acre less per day in the fall than in the spring, due not only to the more difficult conditions mentioned above, but also to the fact that the time spent in the field is about two-thirds of an hour less per day in the fall.

As is the case in spring plowing, the 14-inch plow seems to cover practically as much ground per day as the 16-inch size, provided both are drawn by the same number of horses. The addition of the fourth horse increases the efficiency of the unit by about 10 per cent and the addition of the fifth horse to the 16-inch plow results in a similar increase. Excepting under favorable conditions a sulky plow seems to be somewhat of an overload for three horses of the size and type used on these farms.

Many Gang Plows Used.
Over 450 men reported using horse-drawn gang plows on their farms. About 80 per cent of these plows have 14-inch bottoms. Most of the remaining plows have 12-inch bottoms. Some plows with 13-inch bottoms were reported, but the number was so small that no figures on their performance are given. Over three-fourths of the men who use gang plows also reported the use of sulky plows.

A comparison of an average day's work for 16-inch sulky plows and 28-inch gang plows shows that so far as horse labor is concerned the gang plow drawn by four horses is the most efficient unit in both spring and fall. In the spring this outfit covers one and a quarter acres per day per horse, while both the sulky plow drawn by three horses and the gang plow drawn by five horses cover one acre per day per horse. The gang plow drawn by six horses covers but nine-tenths of an acre per horse.

In the fall four horses with the gang plow cover 1.02 acres per horse, while three horses on the sulky plow and five horses on the gang plow cover .80 acre and .81 acre per horse, respectively. Four horses on the sulky plow and six horses on the gang plow cover .72 and .78 acre per horse, respectively. However, the gang is evidently a heavy load for four horses in the fall, excepting under favorable conditions. The 28-inch gang plow is a somewhat heavier load for six horses, the most popularized team used in the fall, than is the 16-inch sulky for four horses, but is a lighter load than the 16-inch sulky for three horses.

As far as man labor is concerned, the gang plow drawn by six horses is, of course, the most efficient unit both in the spring and fall, but when horse labor as well as man labor is considered, it is seen that the advantage of this largest unit is somewhat lessened.

TIMOTHY HAY IS NUTRITIOUS

Contains About Three Times as Much Digestible Nutrients as There is in Corn Silage.

In 100 pounds of timothy hay there are 48.8 pounds of digestible nutrients, or nearly three times as much as there is in corn silage. Corn silage, being a succulent feed and more palatable is, on the whole, more easily digested. Specialists have calculated that one ton of timothy hay is equivalent to about two and a half tons of corn silage, says Hoard's Dairyman. Putting it in another way, when timothy hay is worth \$10 a ton corn silage is worth \$4.

RESIDENCE PROPERTY, BUILDING LOT, GARAGE

IN DANVILLE, AT

AUCTION

MONDAY, JULY 19th

COURT DAY AT 1:30 O'CLOCK, P. M.

An admirable location. Right in the business section of the City. Right on Main Street, and on Second Street.

THE PROPERTY OF R. M. ARNOLD.

Dwelling house and lot with a frontage of thirty feet on Second Street and running back one hundred and forty feet, adjoins Arnold's Garage, and just opposite Danville Ice and Coal Company's Office.

Brick dwelling, of 8 rooms, with a 23 foot lot sufficient width and running back to a depth sufficient for a good store room, right on Main Street. Known as the Fox Property, just below Second Street. Look at this property before day of sale. Somebody will own it, as it will be sold to the High Dollar without reserve, by-bid or limit.

At the same time we will offer for sale the Arnold Garage, fronting on Second Street.

Here is a splendid chance to buy Danville business and residence property.

Will be sold on easy terms. Possession December 1st.

For further particulars see W. E. Moss, or R. H. Dever, at my Danville offices, or W. A. Dickerson or George Swinebroad, at my Lancaster offices.

SWINEBROAD, The Real Estate Man.

LANCASTER, KENTUCKY.

Our automobiles are at your service.

Look up the dates of my other July Auction Sales. Write for catalogue, giving description of July auction sales and also farms for sale privately.

DISSOLVING PARTNERSHIP

Bright and Paxton's Splendid 235 Acre River Bottom Farm

(Formerly Owned by R. H. Bronaugh,) Subdivided.

All Farming Implements, 50 Head of Stock, 200 Barrels of Corn, Etc.

Public Auction

ON THE PREMISES

SATURDAY, JULY 17th

AT 10:30 A. M.

LOCATED:—Right at the edge of that thriving town of Crab Orchard with her fine schools, churches, stores, bank, famous Crab Orchard Springs, splendid citizenship and less than one mile from passenger depot and shipping station on L. and N. Part of this farm is within the city limits and is penetrated by a street which leads to the Graded High School.

Since W. M. Bright's death it has become necessary to wind up the partnership existing between him and J. B. Paxton. This farm is up for the "High Dollar" without reserve, by-bid or limit. AN ABSOLUTE SALE. The business must be wound up.

THE IMPROVEMENTS:—Old fashioned brick bungalow of 8 rooms, hall, two porches, good cellar, set on a beautiful lawn, with avenue leading from National Highway, "BOONE WAY." Tenant house of three rooms and all necessary outbuildings. Tobacco barn 36 x 100 ft. and 20 ft. to eaves, good stock barn, three corn cribs, large silo of 90 tons, hog houses, etc. Fine orchard. Place well fenced; excellent water, numerous everlasting farm springs and deep well.

All of this rich and fertile farm in grass except about 40 to 50 acres. The clover and timothy meadows and corn in the bottoms are wonderful to see. 150 acres of this farm is tile drained river bottom land on which was placed 20 carloads of drain tile—20 miles of it placed there by and under the expert engineering supervision of the best tile man in Kentucky, just at the beginning of the war before there was any advance in labor, material, and freight. This tile drained land is not affected by either dry or wet weather, having a porous soil to the depth of 15 to 30 feet. A crop rotation of oats, corn and clover is now being maintained and is producing wonderful results, and is becoming as fertile as the valley of the Nile.

This land is producing, and will continue to produce as much corn, clover etc. as any lands in the corn belts of Indiana, Illinois and Iowa, where they sell at from \$300 to \$500. per acre. An opportunity to buy land like this only comes occasionally—do not let it slip.

The 83 acres in upland grows the finest quality of tobacco grown in Central Kentucky. Excellent crops from this land have frequently topped the Danville, Ky., market during the whole season.

This farm will produce larger dividends on the amount invested than any place we know of.

This is undoubtedly the biggest farm opportunity that has been offered in Central Kentucky this year. If you are in the market for a farm, we urge a personal inspection. If you see the land and the crops it produces, you will realize its wonderful value.

Mrs. W. M. Bright and J. B. Paxton say SELL. You know what this means. YOU say what it is worth and take the farm. We merely suggest the terms and look after the details of the sale etc. Terms exceedingly liberal and made known on day of sale. DON'T LET THIS OPPORTUNITY PASS YOU BY.

The personalty belonging to Mrs. W. M. Bright and Messrs J. B. Paxton and James Messer consists of a world of farming tools and implements necessary to run a 600 acre farm, two large cribs of corn containing from 175 to 200 barrels of corn, 50 head of stock of mules, horses, cattle etc.

REMEMBER THE DAY AND HOUR SATURDAY JULY 17th AT 10:30 A. M. Be on hand promptly. Mr. James Messer on the place will take pleasure in showing the farm to prospective purchasers. Dinner on the grounds.

For full particulars, blue prints etc., see, write or phone either Mrs. W. M. Bright, or J. B. Paxton, Stanford, Ky., or

STANFORD, KENTUCKY.

2-First Glass Farms-2 540 ACRES

THE FORESTUS REID LAND IN LINCOLN COUNTY

THURSDAY, JULY 22nd

10 O'CLOCK A. M.

One farm of 300 acres, known as the John Hays farm, and the other farm of 240 acres, known as the Will Hays farm. Adjoins the lands of S. C. Harris and J. B. Paxton. Two miles from Stanford, on the Hustonville pike.

This is the soil which has made Kentucky famous, Limestone soil with Red Clay sub-soil. Here is land that has never been on the market. Sugar tree and walnut land, lots of black locusts.

A LOT OF VIRGIN BLUE GRASS SOIL. No one has ever offered this land for sale and it took me some time to get Mr. Reid to agree to let me sell it. Here is one of the good ones. This is the kind I like to sell, as somebody is sure to want it.

The 300 acre farm is on the South side of the Hustonville pike, has two sets of improvements. 2 six room dwellings with halls and porches, cistern at each dwelling. Stock barn and tobacco barn, watered by springs and ponds. In a high state of cultivation. Fencing good. 45 acres in corn, 3 acres tobacco, 50 acres in grain sown to grass, 30 acres in barley, balance of the farm in grass.

The 240 acre farm is on the North side of the Hustonville pike and has a splendid two story 8 room dwelling with double hall and porches, splendid cellar. Beautiful yard with large shade trees. 1 stock barn, 1 stock and tobacco barn, and other out buildings, divided into convenient fields and splendidly watered. 7 acres in tobacco, 50 acres in wheat and oats, balance in grass.

These two farms are level and gently rolling, all the land can be cultivated, and there is no waste land.

Each farm has a long frontage on the Hustonville Pike, also on the McCormack Church Pike, and both farms will be subdivided and sold in separate tracts from 25 to 125 acres each. But the division will be so that I can sell you just the number of acres you want. Remember Swinebroad "ALWAYS SELLS" and sells to suit the bidders. Will sell it the way you want to bid on it. Will be up and selling to the "High Dollar" and no by bids and no fake sales. All I ask is for you to look over this land, attend the sale and you name the price.

For further particulars see W. E. Moss, or R. H. Dever, at my Danville office, W. A. Dickerson or George Swinebroad, at my Lancaster office, or

Saturday, JULY 17th,

THE ADAMS FARM AT

Public Auction

156 ACRES RIGHT AT HUSTONVILLE, LINCOLN COUNTY KY.

Subdivided into two or more tracts. We may sell a few town lots or one acre tracts, as they are very desirable. It is a matter of general knowledge that land around Hustonville is the most productive land in Lincoln county. This farm we are selling has been owned by its present owners over forty years and has the name of being one of the best little farms at Hustonville. Ask the present tenant who has been there fifteen years. He has taken care of it, kept it in a good productive shape and high state of cultivation and at the same time made lots of money on it. 15 acres in wheat, 30 acres in corn, 25 acres in timothy and balance in blue grass.

The farm has a two story frame dwelling, 8 rooms, 2 halls and two porches, located on fine elevation overlooking the town. Has a large stock and tobacco barn, other out buildings. Watered by everlasting springs and branch of Hanging Fork Creek. Ask any one about that "Good Hanging Fork Land." Has a long frontage on pike. It is generally known that there is more business at Hustonville than any place of its size in this section of Kentucky. Business houses, fine dwellings, hotel, two Banks, good streets, Churches, schools, fine graded and high school. 2 1/2 miles from Moreland, 10 miles from Stanford, 10 miles from Danville. A large section of country is tributary to Hustonville.

AN ABSOLUTE SALE and will be sold on easy terms, for possession January 1st, 1921.

Investigate this one. Look it over carefully.

For further particulars see Adams Brothers at Hustonville, W. E. Moss or R. H. Dever at my Danville offices, or W. A. Dickerson or George Swinebroad, at my Lancaster offices, or

Swinebroad,

EXPLOSIONS AND FIRES THWARTED

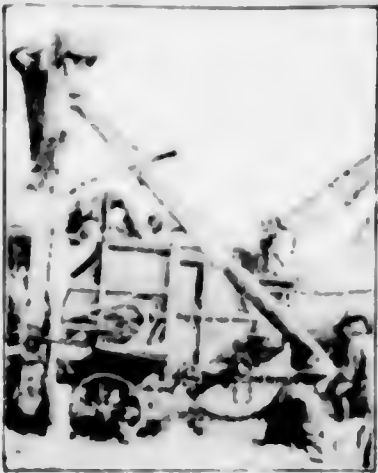

Dust-Collecting Fan, Attached to Threshing Machine, Has Proven Successful.

INSURANCE RISK LESSENER

Method Reduces Wind Dissemination of Smut Spores Which Otherwise Would Be Blown Out of Stacker to Infect the Field.

(Prepared by the United States Department of Agriculture.)

The frequency of dust explosions and fires in connection with threshing operations in the wheat producing section of the Pacific Northwest has led to the development of a dust-collecting fan, a device designed and perfected by engineers of the United States Department of Agriculture.

Threshing Machine Equipped With Special Dust Collecting Fans.

Department of Agriculture in cooperation with the manufacturers of threshing machinery. This apparatus has proved so successful that many grain separators in the Pacific Northwest are now equipped with the device.

Protects Thresher.
This device, when used in conjunction with a wiring system to carry off charges of static electricity developed by the thresher, and further aided by a fire extinguisher adapted to separators, gives the thresher a protection nearly absolute. Eventually this protection will greatly lessen the insurance risk, which hitherto has been at the prohibitive rate of \$80 to \$100 for each \$1,000 of property insured. And this rate is only for a 30-day run.

Produce Results.
Now it appears that the joint project of the bureau of chemistry, plant industry and markets is to produce special results in (1) protection from fire and explosion and a decrease in insurance rates; (2) the cleaning of grain, particularly smut; and (3) the checking of wheat smut through the collection of the smut spores by the fans at the time of threshing. This method reduces the wind dissemination of spores which otherwise would be blown out of the wind stacker to infect the fields.

DESTROY WEEDS IN INFANCY

Easy Matter to Eliminate Noxious Plants From Various Fields at Very Beginning.

Weeds like other things, are most easily destroyed in infancy. This being true, they can best be eliminated from cornfields, gardens, potato patches and elsewhere by destroying them just as soon as they make their appearance. The harrow and the weeder are most usual implements in accomplishing this task before plants are large enough to cultivate.

It is surprising how much good and how little harm will be accomplished even after the corn potatoes and other plants get well started, by going over the fields with the harrow with teeth slanting, or, preferably, the weeder.

REMEDY FOR CABBAGE WORMS

Government Expert Favors Arsenate of Lead and Paris Green for Killing Pests.

A government expert says the best remedies for the cabbage worm are arsenate of lead and paris green. The former being cheaper at the present time is recommended at the rate of two pounds in powder form or four pounds in paste form to 50 gallons of water. Adhesiveness is enhanced by the addition of the same amount by weight of crude resin soap or resin-fishoil soap.

The best form of spraying machinery should be used, with special attention to nozzles in order to secure a mistlike spray.

The arsenicals are harmless when properly applied as directed.

MANY VINES PREFER FENCES

Such Plants as Cucumber, Squash, Melon and Pumpkin Do Better on Some Kind of Trellis.

The cucumber, melon, squash and pumpkin vines, you will find, have high ideals, and would rather climb on the fence or trellis than run on the ground. It will be necessary to support by cords or rags the heavier varieties of melons and squash. Again, the squash bug expects to find his favorite food on the ground.

Make Your Home a Cheerful Home

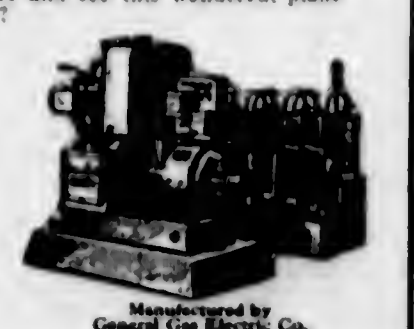

You can't expect folks to be happy and contented where the home is in half-darkness and penetrated by the smell of smoky lamps. Every member of your family is entitled to all the bright electric light which city folks have. If somebody asked you to buy an expensive plant that simply furnished light and no more, you might have some good arguments against such a purchase, but when you think of a lighting plant that is also a plant capable of operating any and every small machine on your place, that is another matter.

Genco Light

is such a plant. In addition to being a perfect electric lighting plant, it has a pulley by which machines can be run while charging your batteries. When this is done, your lights cost practically nothing. Genco Lights is such a positive labor saver that owners figure that this power practically takes the place of farm help. It certainly does enable the help to do more; or less help to do the same work. Genco Light is not a luxury—it is a servant that will increase production and pay for itself in actual dollars and cents. You really owe it to yourself to call here with your wife and see this wonderful plant at work. May we expect you?

What Are You Going to Do About Your Catarrh?

Improper Treatment Leads to a Serious Stage.

Because you have doubtless been fairly comfortable through the mild summer months, and free from the soreness and irritation of the membranes, do not make the mistake of thinking that you are rid of your Catarrh. For if you suffered with this disease last winter, it will again be with you in all its severity unless you eliminate entirely from the blood the germs which cause the disease.

Are you going to further temporize with a disease that leads to such a serious condition? Don't you know that you can use gallons upon gallons of local treatment without the slightest permanent benefit? Just give the matter a little careful thought, and you will realize that it is but a waste of time and money, besides seriously jeopardizing your health, to continue a method of treatment that has proven of so little value in making any real progress toward genuine benefit.

First of all find out just what causes your Catarrh. If it is merely a local irritation and inflammation of the delicate linings of the nose, throat and air passages, then you might reasonably

expect to be cured by the use of local remedies. But have you ever known of one single person to be freed from the slavery of Catarrh by any kind of local treatment?

Why? Simply because they have overlooked the cause of these symptoms, and hence the treatment has been misdirected. Remove the cause of the clogged up accumulations that choke up your air passages, and they will naturally disappear for good. But no matter how many local applications you use to temporarily clear them away, they promptly re-appear and will continue to do so until their cause is removed.

But if you will take a treatment that goes right down to the very source of the disease and attacks it at its starting point, then you are on the right track, and can expect results. S. S. S., the fine old fifty-year old blood remedy is an antidote to the millions of tiny Catarrh germs with which your blood is infested. Don't waste further time by continuing a treatment that can make no progress toward permanent relief, but begin to take S. S. S. today, and you will receive the same benefit that others have.

S. S. S. is sold by all drug stores. Write us for free medical advice about your own case. Address Chief Medical Adviser, 17 Swift Laboratory, Atlanta, Ga.

Sound Philosophic

Advice

The straight line which is the shortest distance between the present and success is Thrift. To tread it, spend wisely, save steadily and invest in Liberty Bonds and War Savings Stamps, "backed by the nation's strength."

The Road To Success

Thrift is power. Why? Because its practice builds character through leading to the right use of money; enables opportunities to be taken advantage of because money is in hand. Be Thrifty. Spend wisely, save steadily, buy War Savings Stamps. "Always worth more than was paid for them."

Ford
THE UNIVERSAL CAR

The Ford One Ton Truck is a profitable "beast of burden" and surely has the "right of way" in every line of business activity. For all trucking purposes in the city and for all heavy work on the farm, the Ford One Ton Truck with its manganese bronze worm-drive and every other Ford merit of simplicity in design, strength in construction, economy in operation, low purchase price, stands head and shoulders above any other truck on the market. Drop in and let's talk it over and leave your order for one.

Haselden Bros Garage.

We are not interested in any cars, except the Ford.

GUY.

the day Thursday with their daughter, Mr. and Mrs. Clark.

Mr. Gabe Elkin of Gilberts Creek was with friends here the first of the week.

Mr. and Mrs. Wm. Griggs and children attended church at Buckeye Sunday.

Mrs. Green and Alfred Poynter were visitors at McCreary Tuesday.

Mr. and Mrs. Milton Ward had for their guests, Friday Mr. and Mrs. Ollie Graham.

Mrs. William Walker and Mrs. James Eason were with Lancaster friends Tuesday.

Mr. and Mrs. Green Poynter, and family spent Sunday with Mr. and Mrs. C. Y. Bailey of Marcellus.

Mrs. John White is slowly recovering from a sickness of three weeks.

Mr. and Mrs. Milton Ward spent Mesdames Carrie Davidson and Wm. Sutton were guests Saturday of Mr. and Mrs. William Romans of Lancaster.

Mrs. Roy Prather and two interesting sons of McCreary visited Mrs. William Scott Friday.

Mrs. John Morris and two children after a visit to her parents, Mr. and Mrs. A. N. Merida, has returned to her home in Rock Castle.

Mr. and Mrs. Mack Turner and children of Marksbury were visitors Tuesday of Mr. and Mrs. Noah Mar-see.

Mrs. Wm. Kinder and sister, little Miss Willie Mae Beazley were Wednesday guests of Mr. and Mrs. Miley Beazley.

Miss Lettie Broadbuss of Bryantsville spent a portion of the past week with Mr. and Mrs. Marcus White.

Mrs. William Barnes spent Sunday with her brother, Mr. and Mrs. Tom Turner and family.

Mesdames William Walker, James Yantis and Wm. Grimes of Judson, were visitors Thursday of Mrs. Wm. Scott.

Mr. Frank Ray and daughter, Miss Montie of Lancaster, spent Sunday with Mr. and Mrs. Tom Hoolin.

Mrs. Carrie Davidson and Mrs. Wm. Sutton were entertained Tuesday at the home of Mr. and Mrs. Guy Davidson of Lancaster.

Mrs. James Yantis and son, Master Herschel were shoppers at Danville Saturday and guests Saturday night and Sunday of Mr. and Mrs. J. B. Adams.

Mrs. C. R. Henry and little daughter, Louise, and son, James Milton and Mrs. Grover Ward of Miss. spent the past week with Mr. and Mrs. Wm. Clark of the Lexington road.

Mr. and Mrs. Miley Beazley, Mr. and Mrs. Marcus White and daughters, Misses Margaret, Ruth and Sallie Lou were Sunday guests of Mrs. John Broadbuss of the Richmond road.

Mrs. W. T. Preston and daughters, Misses Lottie and Irene and sons, Colman and Elmer of Luedale, Ill. spent Monday and Tuesday with Mr. and Mrs. Marcus White.

Mr. and Mrs. Simon Tankersley were honored guests Saturday at an enjoyable dining at the home of Mr. Jess Sebastian.

MERIDA—TANKERSLEY

Considerable surprise was occasioned here Friday afternoon when friends received the news that Miss Ollie Merida and Mr. Simon Tankersley had motored to Crah Orchard, where they were married at the home of Rev. W. C. Hutchins.

They had been sweethearts for several years but kept their secret so well guarded about getting married, that only the families of the parties knew their intentions.

The bride is the beautiful daughter of Mr. and Mrs. A. N. Merida, and is well fitted for the duties she has assumed.

The groom is a very deserving young man, and is now a substantial farmer. He served honorably in the service of his country over-sea during the war. He is to be congratulated on winning the girl of his choice, and all their friends wish for both much happiness and prosperity thru life.

The bride wore a chic blue georgette suit with hat, and gloves to match.

The happy couple will make their home this year with Mr. and Mrs. H. K. Sebastian on the Kirkville road.

Raisins.

The word raisin is generally used to refer to the dried grape. Raisin grapes are usually the product of warm climates and contain from 30 to 35 per cent of sugar. The principal and most valuable class of raisin grapes is the muscatel. The seedless raisins of commerce are largely Sultan grapes. The smallest ones come from the current grape.

WOLF TRAIL.

Delayed

Mr. Elijah McMillan has purchased a new Ford car.

Mr. and Mrs. Homer Ray entertained a few relatives Sunday.

Mr. and Mrs. Bob Pollard visited Mr. and Mrs. Geo. Gillean recently.

Miss Huelah May was the guest of Miss Thelma Simpson Saturday night.

Mr. and Mrs. Harmon Teater were guests of Mr. and Mrs. Allen Teater Sunday.

Misses Stella H. and Katherine Daily has returned from a weeks visit in Madison.

Mr. and Mrs. Carl Cotton and children were visitors in Madison Saturday and Sunday.

Mrs. John Fain and little daughter of Kansas is here visiting Mr. and Mrs. Joe Ray.

Mrs. Edwin Davis of South Carolina spent Saturday night with Mr. and Mrs. Mose Ray.

Mr. and Mrs. Otis Stotts and Miss Lucille made a recent visit with Mr. and Mrs. Steve Agie.

Mrs. Elijah McMillan and son spent the day Tuesday with her parents, Mr. and Mrs. John Ray.

Mr. Henry P. Sebastian and Miss Etta Bell Ross spent Saturday night with Mr. and Mrs. Wilbert Dailey.

Mr. and Mrs. Carl Moberley and Miss Leola were visitors of Mr. and Mrs. Fred Howard Saturday night.

CHANDLER SIX Famous For Its Marvelous Motor

The Chandler Dispatch Car Has First Preference

The automobile industry has produced no distinctive model more popular than the Chandler Dispatch, a car reflecting in its lines the character of its service. It is the first preference among those who want a four-passenger close-coupled open car. Its comfort, its beauty of line and finish, and its dependability are typical of the established Chandler quality.

The popularity of the Dispatch, which reaches to every corner of the world, is based not only on the grace

of its trim design, and its beautiful Rainbow Blue Enamel, but on the quality as much to the standard Chandler chassis upon which it is mounted. It seats four persons with utmost comfort. The driver's position is testful. The cushions are deep, well tilted and trimmed in the best of genuine hand-tooled leather.

With its wonderful flexibility of power, its ease of driving and real comfort, characteristic of all Chandler models, everybody likes the Dispatch.

COMMITTEES Of D. A. Named.

Mrs. Arnold Announces State Officials for Year at Lexington.

Lexington, Ky., Mrs. J. M. Arnold, of Covington, state regent of the Kentucky Daughters of the American Revolution, recently announced the state committees for the ensuing year at a meeting of the board of managers at the Phoenix Hotel.

The board includes the chairman of standing committees. Those present in addition to Mrs. Arnold, who presided, were: Mrs. Christopher D. Chennault, Lexington; Mrs. J. A. Her-ring, Georgetown; Mrs. William Rod-ge, Lexington; Mrs. John Graham Johns, Winchester; Mrs. W. H. Thompson, Lexington; Mrs. George Baker, Frankfort; Miss Julia Spurr, Lexington; and Miss Elizabeth Grif-fis, of Paris.

The committees named by Mrs. Arnold are as follows:

Education—Miss Rebecca Averill, Frankfort, chairman; Mrs. R. L. Stout, Lexington; Mrs. Malden, B. Adams, Georgetown; Mrs. Paul Burnham, Richmond; Mrs. J. L. Phil-lips, Pineville; Mrs. Henry L. Stone, Louisville.

Press—Miss Annie M. Poage, Ashland, chairman; Mrs. John L. Woodbury, Louisville; Miss Bessie Taul Conkright, Lexington; Mrs. Richard H. Cunningham, Henderson, and Miss Edna Bronaugh, Hopkins-ville.

Protection of the Flag—Mrs. James A. Leach, Louisville, chairman; Mrs. R. E. Briggs, Mayfield; Mrs. J. R. Luten, Fulton; Miss Eliza Spen-der, Jackson; Mrs. J. E. Robinson, Louisville.

D. A. R. Magazine—Mrs. Thomas Duckworth, Nicholasville, chairman; Mrs. J. B. Wilcox, Paducah; Mrs. J. H. Eyre, Newport; Mrs. J. C. Riley, Henderson; Mrs. B. E. G. Hardtown. Old Trails—Mrs. J. S. Watkins, Owensboro, chairman; Miss Erna Watson, Lexington. The other mem-bers will be selected by the chair-man.

Conservation and Thrift—Mrs. George H. Wilson, of Louisville, chairman, will select the other mem-bers of the committee.

Kentucky Room in Continental Hall—Mrs. E. G. Hoone, Paducah, chairman; Mrs. J. Chester Worthing-

ton, Louisville; Mrs. Walter Scott Glaze, Danville; Mrs. Hiram Quack-entush, Covington; Mrs. Mattie B. Hines, Bowling Green.

Preservation of Historic Spots—Miss Julia Spurr, Lexington, chair-man; Mrs. W. H. Whitney, Louis-ville; Miss Katherine Bradley, Georgetown; Mrs. Albert Curry Har-rodsburg; Mrs. T. W. L. VanMeter, Winchester.

Real Daughters—Mrs. S. B. Pul-lam, Paducah; Mrs. Victor K. Dodge Lexington; Mrs. Clement Chinn, Frankfort; Miss Caroline Knight, Nicholasville.

Preservation of Archives and Rec-ords—Mrs. W. H. Thompson, Lex-ington, chairman; Mrs. Bessie Todd, Shelbyville; Mrs. J. E. Robinson, Lancaster. The other members will be selected by the chairman.

Women!

Here is a message to suffering women, from Mrs. W. T. Price, of Paducah, Ky.: "I suffered with painful...," she writes, "I got down with a weakness in my back and limbs...I felt helpless and discouraged...I had almost given up hopes of ever being well again, when a friend insisted I

Take CARDUI

The Woman's Tonic

I began Cardui. In a short while I saw a marked difference... I grew stronger right along, and it cured me. I am stouter than I have been in years. If you suffer, you can appreciate what it means to be strong and well. Thousands of women give Cardui the credit for their good health. It should help you. Try Cardui. At all druggists. E-73

Cracks at Creation.

And prices? Not in sight yet.

A word to the wise is sufficient. To the fool it is one too many.

A man can always dictate to his typewriter, but seldom to his wife.

All is quiet in Mexico at this writing, but we make no predictions as to an hour from now.

Don't worry over the troubles of your neighbor. The modern way is to let him worry over yours.

The small boy with a hook, a line, and a worm is never without joy. It is good for a nibble or two.

Life holds a barrel of joy for you, if you want it. But it expects you to pull the plug out of the bung hole.

The young man with a multitude of ideas often finds that his multi-tude has come nothing but a jumble.

A girl may not enthuse much over the man, but it's no trouble at all to go into raptures over the engage-ment ring.

It is no longer considered hazard-ous to buy a pig in a poke. If the poke is made of cotton it is more valuable than the pig.

You can call some people hard names without insulting them, the you may give deadly offense. The truth is never an insult.

It's no disgrace for a brave man to admit that he has been licked by a better man. Only the craven tries to bluff it out afterwards.

We'd hate to think that the amount of hair a man possesses is an index to the quality of his courage. What would we say of our baldheads?

It's quite sporty to read the base ball news each day, but it would be even more sportmanlike to pull off a game ourselves once in awhile.

It was really unkind of our office devil to suggest that some men prefer to go to hell because they know they can't get a drink in heaven.

Even the lowly but useful angle-worm has not escaped the high cost craze. Twenty-five cents a dozen is a modest price at some fishing re-sorts.

Those alluring curves of the femi-nine form are rapidly ceasing to be attractive. The masculine mind soon loses interest in anything that be-comes common.

An inquirer in a city paper wants to know if it is legal for a young man of thirty to adopt a young wom-an of twenty-five. It is—with a wedding ring.

Trouble with these political planks is that there is too much politics and too many planks. One can't take the time to read them and still earn three meals a day.

Some one ought to tell congress the war is over. It's a burning shame to keep our dear senators and congressmen in ignorance of this fact all of these months.

We have reconsidered our hard and fast rule of not publishing the effusions of local poets. We now make a modest charge of a dollar a line, cash up and no discount.

It is distressing to think that our rich men have to go to Europe to get a "drink," and equally distress-ing to think that many Europeans have to come here to get something to eat.

Aladdin's Slaves Not

So Powerful.

Liberty Bonds, "the world's pre-mier investment security." Why? Because the credit and wealth of the United States are back of them. Buy Liberty Bonds and Victory Notes at "market prices."

McRoberts Says

After you eat—always take

EATONIC

(FOR YOUR ACID-STOMACH)

Instantly relieves Heartburn, Bloat-ing, Gassy Feeling, Stops food souring, repeating, and all stomach miseries. Aids digestion and appetite. Keeps stomach sweet and strong. Increases Vitality and makes wonderfully healthy. Take of three or two a day to see it. Fruitfully "renewing" to please or you will refund money. Get a bottle today. You will see.

R. E. McROBERTS, Lancaster, Pa.

Frequent Showers In-Sure Big Crops

The greatest growing weather in years—that's the way many of the growers express their opinion of the present weather, they asserting that the hot weather is equally as bene-ficial and necessary as the cooler, although not so pleasant, but the rains that interperced the dry spells are said to have been coming with sufficient frequency to make the best growing weather possible. Tobacco is growing as never before, it is said, regarding the crop in this lo-cality. For some time the dry weather threatened some which was set out late, owing to the lack of rain and the incoming wheat har-vest. These plants are said to be taking on new life and doing well.

The wheat harvest, which will be closed within a short time, is pro-ving to be a busy one and the quality is reported good. There is still a demand for workmen in the fields. Oats is calling for the attention of the reaper, and it is claimed that there has already been a greater quantity of alfalfa put away for the year than was cut during the entire sea-son last year.

JUDSON.

Mr. Henry Grimes continues ill. Mrs. Robert Simpson is slowly im-proving.

Mrs. G. N. Ray who has been quite ill is improving.

Mrs. Henry Grimes is suffering with a sprained arm.

Mrs. Sun Ray spent Monday with her sister, Mrs. Nanette Ray.

Mrs. Mose Simpson of Jessamine county is visiting relatives here.

Mr. and Mrs. B. M. Lane spent Sunday with her sister, Mrs. Mack Gay.

Mr. and Mrs. Howard Logan spent Sunday with Mr. and Mrs. James Hicks.

Mr. Willie Ray of Ohio is at home for a few days stay with his moth-

er, Mrs. Nannie Ray and family.

Walter B., the little son, of Mr. and Mrs. Lawrence Pollard has re-turned home after several weeks stay with his grand parents, Mr. and Mrs. Ben Pollard.

Ohio Newspaperman to Be Next President

Ohio, "Mother of Presidents" State, will be the battleground of the greatest political campaign in her history this summer with two of her native sons contesting for the Presidency of the United States.

While Marion, the home of Sena-tor Warren G. Harding, the Republi-can nominee, and Dayton, the home of Governor James M. Cox, the Democratic standard bearer, will come in for their share of promi-nence, eyes of the nation will be centered on the capital of Ohio where much of the work of the cam-paign will be carried on.

It is the first time in many years that both parties have picked their nominee from the same state and incidentally, the first time two news-paper publishers have been pitted against each other for the chief ex-ecutive of the Nation. It will be the first time a newspaperman has ever been elected President if ei-ther Cox or Harding is elected.

World's Premier

Investment

"As certainly as the nation endur-es," Liberty and Victory Notes will be reduced at par on the date of ma-turity. Exceptional profits belong to the man who buys now. Any bank or broker will sell them to you.

Common Delusion. "One reason for high prices," re-marked Jud Tunkins, "is that so many people think nothing can be any good unless it costs a lot of money."

STORMES DRUG STORE.

A Tractor Farm--145 Acres
FOR J. M. McGRAW, IN LINCOLN COUNTY, AT

AUCTION

Friday, July 23,

AT TEN O'CLOCK,

LOCATION—On Short Pike, 1-8 of a mile from the Danville and Hustonville Pike, 6 miles from Danville, 6 miles from Stanford, 2 miles of Graded School, 2 miles from Q. and C. Railroad, in good neighborhood, yard fronts right on the pike, is a beautiful home and you are sure to like it.

Will be sold in three tracts.

TRACT NO. 1—105 acres, with splendid 7 room two story dwelling, fine stock barn, 4 acre tobacco barn, large double crib, garage, best dairy in the County, other out buildings, all in first class repair; everlasting water, 2 good orchards. In cultivation as follows: 40 acres in corn, 20 acres in wheat sown to clover, 12 acres of oats, 12 acres of meadow, 2 1/2 acres of tobacco, remainder in grass.

TRACT NO. 2—20 acres, good 3 room house, good orchard, everlasting water, 8 acres in corn, one acre in tobacco, balance in blue grass.

TRACT NO. 3—20 acres, unimproved, all in corn.

Each tract faces on the pike and two or more tracts can be had together to get the size farm you want. This farm produces well and somebody will buy a bargain. We have sold two farms for J. M. McGraw at auction, and he is the kind we like to do business with. Mr. McGraw is like we are, he puts them up, turns them loose and somebody buys a farm.

Don't overlook this one. Spend the week with us. Auction sales every day this week.

Possession January 1, 1921, or earlier if the purchaser desires. Will be sold on easy terms.

For further particulars see Mr. McGraw, W. E. Moss or R. H. Dever, at my Danville offices, George Swinebroad or W. A. Dickerson, at my Lancaster offices.

300-ACRES-300

The Farm of Will Matheny at

PUBLIC AUCTION

To The HIGH DOLLAR On

WEDNESDAY, JULY 21st,

AT 10:00 O'CLOCK,

LOCATION—Lincoln county, on the Ottenheim pike, 5 miles south of Stanford, in good neighborhood, close to schools and churches, quarter of mile from L. and N. Railroad Station. It is admitted that Will Matheny is one of the very best farmers in Lincoln County, and the condition of this farm and improvements and everything about the farm proves it. Here is one of the best money makers that we have on our list. Matheny has petted and taken care of the farm and it is ready for the next man to make money on. Fine tobacco land; sugar tree and black walnut. Improvements modern and up to date. 2 story 8 room dwelling, 2 halls and 2 porches, metal roof, electric lights, water works, bath room; a new house with modern equipment. One three room tenant house, one stock barn, one 12 acre tobacco barn, new garage and all other out buildings. Cistern at house and at barn and fine young orchard. 12 acres in tobacco, 26 acres in wheat, 60 acres in corn, 70 acres in blue grass, a lot of it virgin soil, balance in clover and timothy meadow.

About 125 acres will be sold with the improvements, the balance divided into several tracts with good frontage on pike.

There ought to be a "BUNCH" of buyers on this farm as every fellow who sees it will want it, but the other fellow might not be able to get there so you come and secure a bargain. Take our word for it, very few like this one on the market. Will be sold for possession January 1, 1921, with the usual fall seeding privileges and on easy terms.

Remember this land is up and selling to the high dollar. All you have to do is to bid last.

For further particulars see Mr. Matheny on the premises, or W. E. Moss or R. H. Dever at Danville, or W. A. Dickerson or George Swinebroad at my Lancaster office, or

"Lookee Here"

186 ACRES

Garrard County Land

-- AT --

AUCTION

Tuesday, July 20,

10 O'CLOCK.

THE FARM OF HAMPTON SISTERS.

LOCATION—Fishers Ford Pike, 6 miles from Bryantsville, 8 miles from Danville, 2 miles from Danville and Lexington pike (the new Federal Highway.) This is high class land, gently rolling, very productive, in high state of cultivation, tobacco, corn, wheat and hemp land. Reason for sale they own another farm and must sell one. They are offering the one the buyers want. This farm joins the lands of George Robinson and Frank Folger. In the same neighborhood and on the same pike as the lands of Yates Hudson, Green Bowling, I. M. Dunn, Pence Brothers and others, none of whose land can be purchased at any price. They own good land and wont sell.

IMPROVEMENTS—6 room, 2 story dwelling, one hall, one porch and excellent garden spot; new tenant house, 9 acre tobacco barn; 2 stock barns, other out buildings. Watered by never failing springs and ponds. Excellent fish pond. Fencing good. 11 acres in tobacco (new sod), 40 acres in corn, 20 acres in wheat, sown to grass, 35 acres clover meadow, 25 acres clover pasture, 50 acres old blue grass sod.

Will be sold for possession January 1, 1921, and on easy terms.

Don't overlook this one.

Everybody knows what Garrard County land is and especially in this section. Look it over carefully before the sale. When you look you will be a bidder.

For further particulars and to show you the farm see the owners on the premises or W. E. Moss or R. H. Dever at my Danville office, or W. A. Dickerson or George Swinebroad, at my Lancaster office, or

AIM AND VALUE OF FARM CLUBS

One of Important Features of Extension Work Conducted by Relation Service.

INSTRUCT GIRLS AND BOYS

Larger Yields Have Been Obtained, Better Pigs Have Been Raised, and Finer Cattle, Dairy and Beef Have Been Raised.

(By H. T. MURKIN, Secretary of Agriculture.)

Boys' and Girls' club work is one of the important features of the agricultural extension work conducted by the state relation service, United States department of agriculture, in cooperation with the state agricultural colleges and local agencies for the purpose of improving agricultural conditions and practices throughout the country. These clubs are organized to improve farm and home practices by instructing the boys in correct agricultural methods and the girls in home-making; to assist them in demonstrating these methods for the improve-

A Pig Club Girl.

ment of the farm and home; to aid in the development of co-operation in the family and in the community; to create a more favorable attitude toward the business of farming and home-making by encouraging property ownership and the feeling of partnership; and to make rural life more attractive by providing organization which tends to diminish isolation and develop leadership.

Benefits Derived.

These objects are in process of attainment. Wherever club work has been pushed by our agents, larger yields have been obtained, better pigs have been raised and finer cattle, both dairy and beef, have been grown. The motto of the clubs is "To Make the Best Better." Registered animals are now common where only a few years ago they were unknown, and there is a systematic effort to cull out scrub live stock and poultry. Large yields of crops have been made by club members on lands which were considered worthless, and little girls are vying with the best packers in canning and preserving fruits and vegetables, and are becoming a potent factor in helping to make the farm home more attractive and enjoyable.

The average yield per acre made by club members in the growing of field crops is two to three times as large as the average yields made in the states in which the members are located. Many people, seeing a boy or girl here and there engaged in club work, do not realize the value of the products produced by these young folk in the aggregate. In 1918, while under the stress of war and responding to an appeal made to club members in the furrows "over here" to help feed the boys in the trenches "over there," the records in the office show that these young people produced food and feed to the value of more than \$20,000,000.

Helps Boys and Girls.

The money value of the products of club members is only a small part of the value of club work. Many boys and girls have had their vision of life enlarged by club membership. Many have taken and are taking college training. The agricultural colleges of the country especially have profited in enrollment from the clubs. Many boys and girls have made their own money to defray their college expenses in club activities. Many after graduation have returned to the farms or have engaged in extension work as county agents. Rural life has been greatly enriched in recent years by the trained leadership obtained from agricultural clubs. The results obtained in this work justify many times the expenditures made in securing them and appeal strongly for a larger development of this useful work.

NEED WINDBREAK IN SUMMER

Protection Given to Garden and Fruit Plantation From Hot South-west Winds.

A farm needs a windbreak in summer as much as in winter. Did you ever notice the difference in the garden and fruit plantation on two farms, one sheltered from the hot southwest wind and the other exposed to it? The windbreak pays in dollars and cents.

Swinebroad's Series of JULY AUCTION SALES OF FARMS & CITY PROPERTY

Memorize the dates, then follow your memory.

Send for catalogue giving full description of the different farms, also descriptive catalogue of farms for sale privately. We "Turn Down" an auction sale proposition unless it appeals to us as something the buying public wants. Therefore, we "ALWAYS SELL." We sold 1500 acres in June for over \$268,000.00. Every auction was a sale and every purchaser can now sell at a profit.

NOW GET THE DATES.

Saturday, July 17th, 156 acres, subdivided, the Adams Farm, right at Hustonville, Lincoln County. Will be sold at 10 o'clock, A. M.

Monday, July 19th, 1:30 o'clock, P. M., Residence and Business property and garage in Danville, on Main and Second Street. The property of R. M. Arnold.

Tuesday, July 20th, 10 o'clock, A. M., the splendid farm of 186 acres of Hampton Sisters. That good Garrard County Land, on Fishers Ford Pike, 2 miles from Lexington and Danville Pike, 8 miles from Danville.

Wednesday, July 21st, 10 o'clock, a. m. the Will Matheny farm of 300 acres, in Lincoln County, on Ottenheim Pike, 5 miles from Stanford. Will be subdivided.

Thursday, July 22nd, 10 o'clock, A. M., 2 farms for Forestus Reid, Lincoln County, 2 miles from Stanford, on Hustonville Pike. A farm of 300 acres and a farm of 240 acres. Both farms will be subdivided, and sold in tracts to suit the purchasers.

Friday, July 23rd, J. M. McGraw's Tractor Farm of 145 acres, on Short Pike, 1-8 mile from the Danille and Hustonville Pike, 6 miles from Danville and 6 miles from Stanford. Will be sold in three tracts.

On any of these farms you can get just the number of acres you want. It will be a pleasure to show you over these different farms. Some body will buy a bargain. Why not you? It will be a pleasure to send you a catalogue giving full description of the farms and also description of lands in several counties for sale privately.

We will also have sales on other dates not set out above.

Be sure to get in touch with real estate headquarters, we will make you money.

For further particulars send for catalogue, see the owners of the farms, or W. E. Moss or R. H. Dever at my Danville offices, or George Swinebroad, or W. A. Dickerson, at my Lancaster office.

SWINEBROAD,

The Real Estate Man. Lancaster, Ky.

DO YOU KNOW THIS TRADE MARK?

It represents the

"Exide" Starting and Lighting BATTERY

—the battery that by hard, sturdy, powerful and persistent service in motor cars all over the country has earned itself the title of "the Giant that lives in a Box."

The "Exide" Battery is a giant of the most dependable sort. Every ounce of it represents strength and endurance; every detail of its construction has been proved right in many years of practical performance. It was designed and is manufactured by the largest maker of storage batteries in the world.

Put an "Exide" Giant's power behind your starting and lighting system and have done with guesswork.

Inch for inch and pound for pound, there is more power and punch in the "Exide" Giant than in any other starting battery.

PRESERVE FRUIT AND VEGETABLES

Successful Drying Plants Prove of Great Value in Various Parts of Country.

PLANS FOR ERECTING PLANT

Number of Farmers Can Club Together and Build Driers at Comparatively Small Expense—Saves Women Much Work.

Fruit and vegetables wait for no man when they reach their prime and this time is usually just when the farmer's wife is busiest and the days are hottest. Nowadays, help is very difficult to obtain in the country, yet the family's supply of fruit and vegetables for winter must be saved when they are in season. In many neighborhoods the community drier for preserving surplus fruits and vegetables has proved a godsend to the women living near it.

The time to build a drying plant is in the spring before the rush of summer's work sets in. If a number of farmers club together to erect such a drier the expense to each family is small. Where only a few families wish to use a co-operative plant a small but satisfactory drier may be

season. Wet weather has no effect on this type of drier.

The house is 8 by 12 feet. The uprights in front are 6 feet 8 inches. The uprights in back are 6 feet 2 inches to give roof 6 inches fall for watershed. Doors are fastened to 2 by 4-inch uprights in front. Doors are 2 feet 8 inches by 6 feet 8 inches. The furnace is 35 by 35 inches by 4 feet, covered with two sheets (24 gauge) black sheet iron 2 inches apart—air space to prevent fire. The radiation is secured by ordinary stove pipe attached to furnace.

The house is heated after the plan of a tobacco barn—a small furnace of rock or brick is built at one end and a stovepipe carries the radiation to the opposite end of the house and back with an elevation of 2 feet above the furnace. This stovepipe may extend outside of the house a sufficient space to escape the gases and an elbow and three or four joints may act as a chimney; or, if a chimney is preferred, it may be built at a cost of \$4 or \$5 additional.

Plan of Trays.

There are three lattice partitions in the house, making four sections 32 inches wide for drying trays; 32 inches above the still place across a piece 2 by 4 inches on which the center uprights 2 by 4 inches and the back upright 2 by 4 inches rest. (Put upright pieces the 2-inch way.) The tray bearers, 3 by 3-inch strips are fastened to the uprights. The space between the tray bearers is filled with 2-inch strips to act as guides for the trays and to force the draft to circulate between the trays. If these spaces are left open it will act as a

Attest—J. B. Bourne
Clerk, Garrard County Court
By Cronley Broadus, Deputy Clerk.

BRADSHAW MILL

Delayed

Miss Nannie R. Pearson of Richmond spent the past week with Mrs. Allie Reynolds of Guna Chapel.

Misses Linda Sanders and Nannie R. Pearson were among the dinner guests of Miss Bettie Curtis of Cartersburg Sunday.

Mr. and Mrs. Floyd Snyder and son, Harlan were guests Sunday of Mr. and Mrs. Willie Taylor of Madison.

Gambling Vs. Sound Investment

"Twenty on the red," says the man who puts his money into speculative chances. "All of it" while I can get it back with interest," says the man who buys Government securities. War Savings Stamps are always worth more than put for them.

Several Farmers Might Co-operate in Erecting Drier of This Type.

built by the following directions, which are recommended by the United States department of agriculture:

Use Thermos Principle.

The thermos or fireless cooker principle is used in this drier; that is, a space of 3 or 4 inches is allowed between the walls of the house, to be filled with sawdust. This holds the heat and relieves the necessity of a constant watch over the fire. The furnace should be placed at the opposite end from the door and a stovepipe run from furnace end to the door end and back with sufficient elevation to cause good draft. A drier of this size and type should, with good management, dry from 4 to 6 bushels a day, and should pay for itself in one

due and carry off the heat. The sides of the trays are of 3/4 by 3-inch lumber, making the tray 3 inches deep. The bottom of the tray is made of lattice strips 3/4 by 1 1/4 inches, with 1-inch space between the strips running lengthwise. The trays have a center partition to support the bottom laths and cheesecloth is used to cover the laths. There are 8 inches from the top of one tray to the top of the next. The trays move on the bearers like a bureau drawer.

A small opening must be left at top of house just above doors—an outlet for steam. A 3-inch opening at front foundation must be planned to let in cool air to keep the fruit from sweating.

TOUGH MEAT CAN BE MADE QUITE TENDER

Long Cooking at a Low Temperature Is Necessary.

Many Ways of Preparing in Water Without Allowing It to Reach Boiling Point—Possibilities of Double Boiler.

Tough pieces of meat are as nutritious as the more tender cuts and can be made quite as appetizing, but they require long cooking at a low temperature. There are many ways of cooking meat in water without allowing it to reach the boiling point, culinary experts in the United States department of agriculture affirm. With the ordinary kitchen range this is accomplished by searing the meat until brown, to develop the flavor, then cooking on the cooler part of the stove rather than on the hottest part, directly over the fire.

Experience with a gas stove, particularly if it has a small burner known as a "simmerer" usually enables the cook to maintain temperature which will make it tender without hardening the fibers. The possibilities of the double boiler for this purpose seem to have been neglected. Its contents can easily be kept up to a temperature of 200 degrees Fahrenheit and nothing will burn.

Another method is by means of the fireless cooker. In this a high temperature can be maintained for a long time without the application of fresh heat. Still another method is by means of a closely covered baking dish. Earthenware dishes of this kind suitable for serving foods as well as for cooking are known as casseroles.

The Dutch oven or cast iron pot with a heavy close-fitting top is an excellent utensil for the long cooking of meats.

REMOVE STAINS FROM WOOL

Generally More Difficult Than Treating Cotton or Linen—Avoid Use of Chemicals.

In general it is more difficult to remove stains from wool and silk than from cotton or linen. In removing stains from materials made from two or more kinds of fibers, such as silk and cotton mixtures, the possible effects of the stain removers upon all of the fibers should be considered says United States department of agriculture. No chemical should be used which would injure the most delicate of the fibers present.

OF INTEREST TO THE HOUSEWIFE

Paper shelled almonds have usually larger kernels.

White fur can be cleaned by brushing with cornmeal.

Handsome curtains can be made only of good material.

Old quilts can be washed and saved for lining new ones.

Orange will peel easily if allowed to stand in hot water for five minutes.

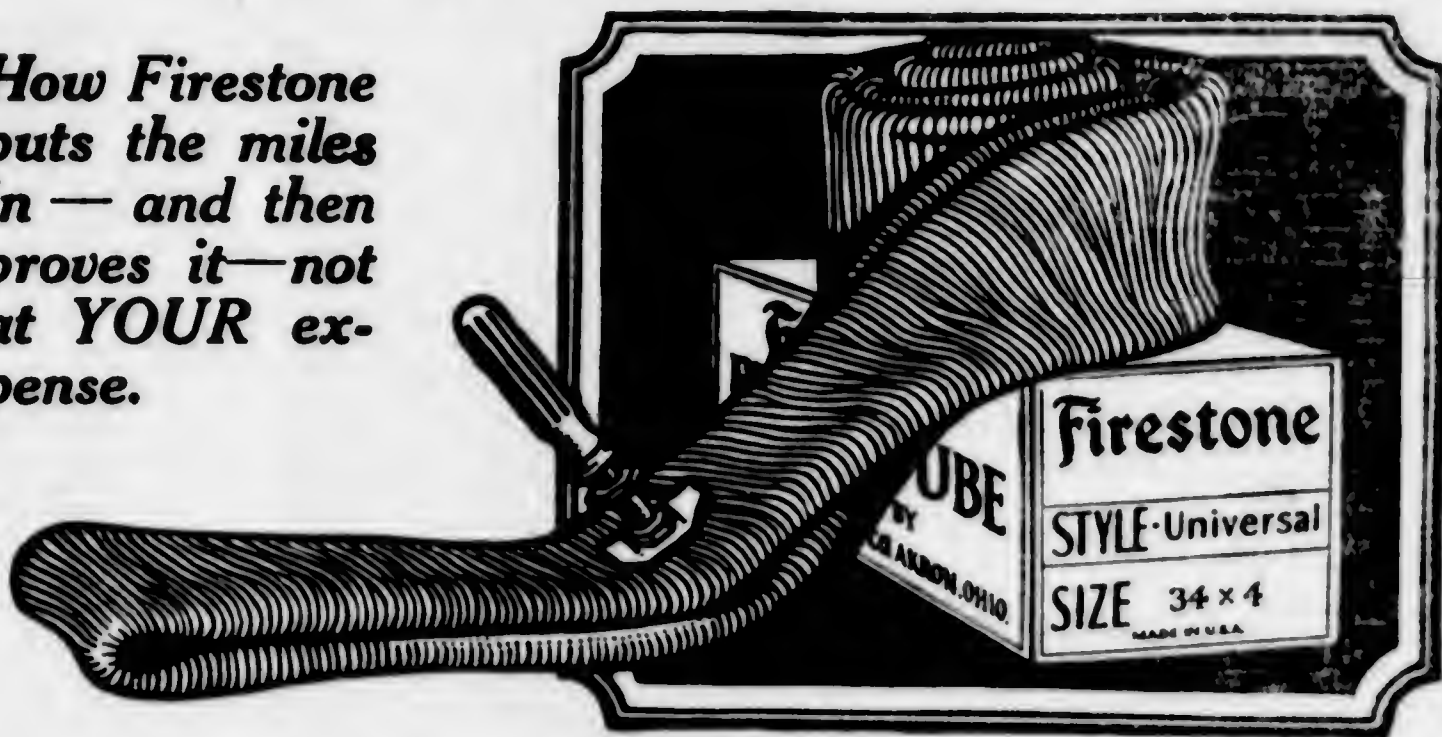

Soak handkerchiefs in a pall of salt and water before putting them into the ordinary wash water.

Get rid of tufted and cushioned furniture as soon as possible. Dust is the greatest friend of disease, and much dust lingers in upholstered furniture.

If you have oversalted the soup throw in a few slices of raw potatoes. This will absorb the excess salt. Remove the potatoes before serving the soup.

A big-scale road test on 3,200 tubes

How Firestone puts the miles in — and then proves it—not at YOUR expense.

No other tubes in the world are road tested on so big a scale as Firestones. The Yellow Cab Company of Chicago uses Firestone Tubes exclusively on its 800 taxi cabs. The service of these tubes is checked constantly—improvements and developments are arrived at.

By close watching of a large number of tubes in service—not confined to isolated instances, the conclusions are accurate and definite.

Firestone puts the best in materials into tubes by establishing purchasing experts at Singapore, center of the world's rubber market. Firestone puts the best in workmanship into tubes by organizing the crack manufacturing organization of the industry on a profit-sharing basis.

And then subjects the finished product to this big-scale road test—in order to get you more for your tube money and more miles out of your tires. And yet Firestone Tubes cost no more than the ordinary kind.

Firestone Tubes
